Info for Zona Wyyerd

- **Brief overview of fiber optic**
- **Panel of members who will talk about their experiences with Zona Wyyerd**

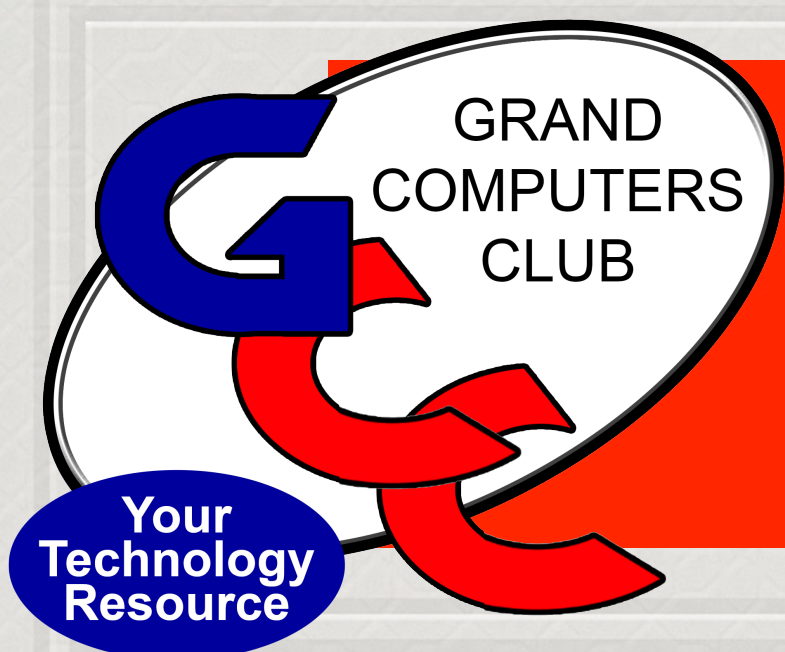

Brief Overview of Fiber Optic

- **A fiber connection that uses light signals to send data to and from your computer or television.**
- **Fiber internet uses fiber-optic cables instead of copper wires.**
- **The fiber-optic cables are filled with glass filaments. Information is sent back and forth by lasers and light signals**

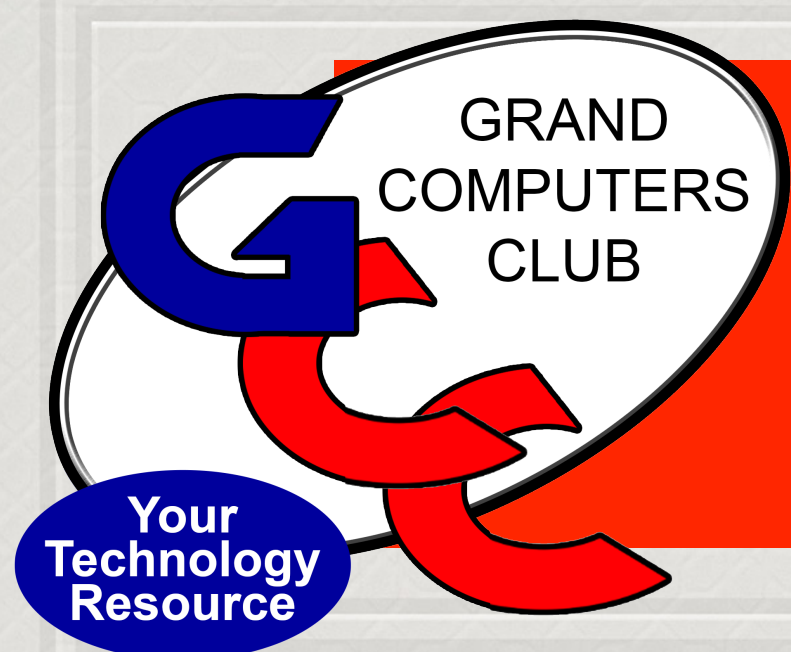

Why Does this Matter?

- **Fiber connections don't get distorted over long distances like copper wire connections do.**
- **DSL & cable internet rely on Copper wires-same kind used to transmit your voice over a telephone line.**
- **Length of internet cable also matters - can distort the signal**
- **Transmission speed depends on how much data the infrastructure can handle.**

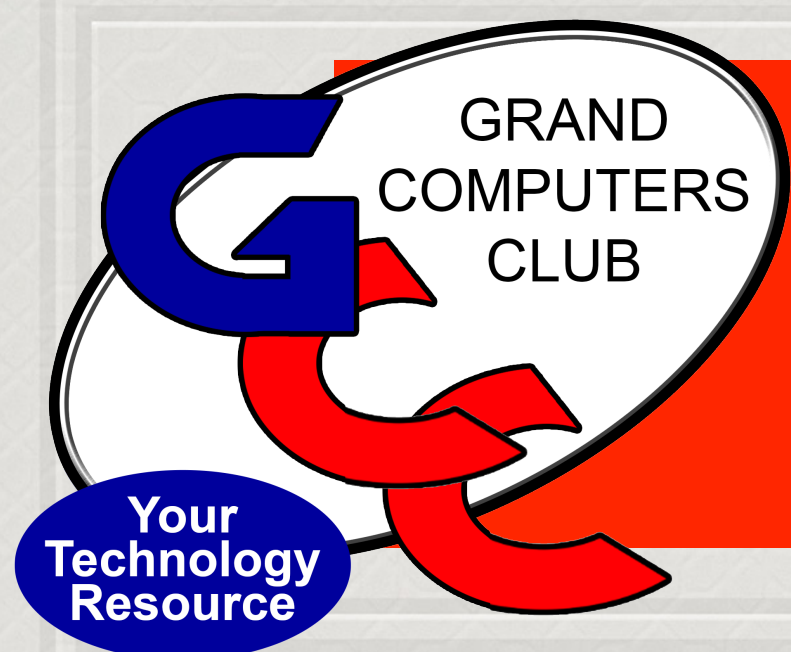

Who is Zona Wyyred?

- *Wyyred Group (“Wyyred”) is a locally - managed fiber based internet and related services company.*
- *Founded in 2017 with headquarters in Colorado.*
- *Expanding organically & inorganically (M & A)*
- *Acquired Zona Communications in 2019*

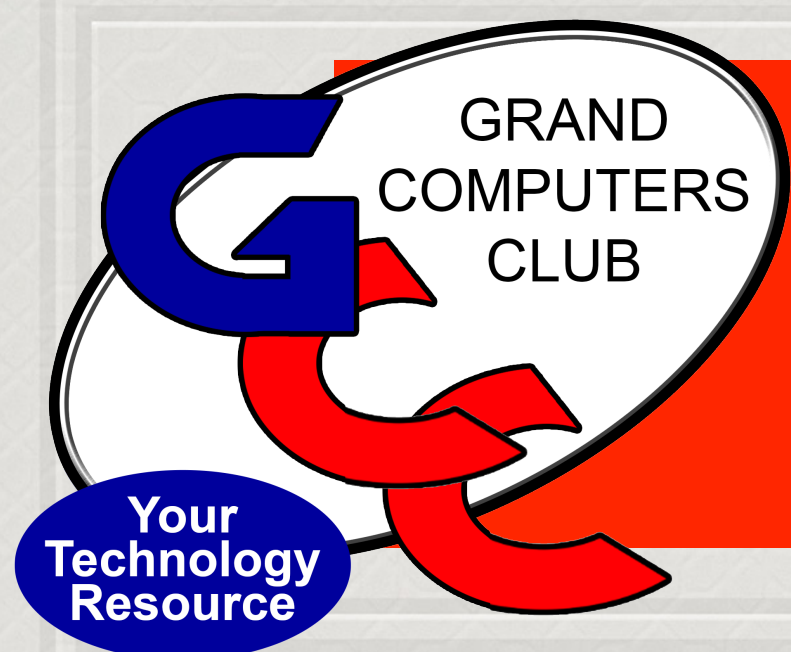

Benefits of Switching

- *Faster upload and download speeds and the same speed for upload and download*
- *Introduce our panel and let them tell you why you might want to switch.*

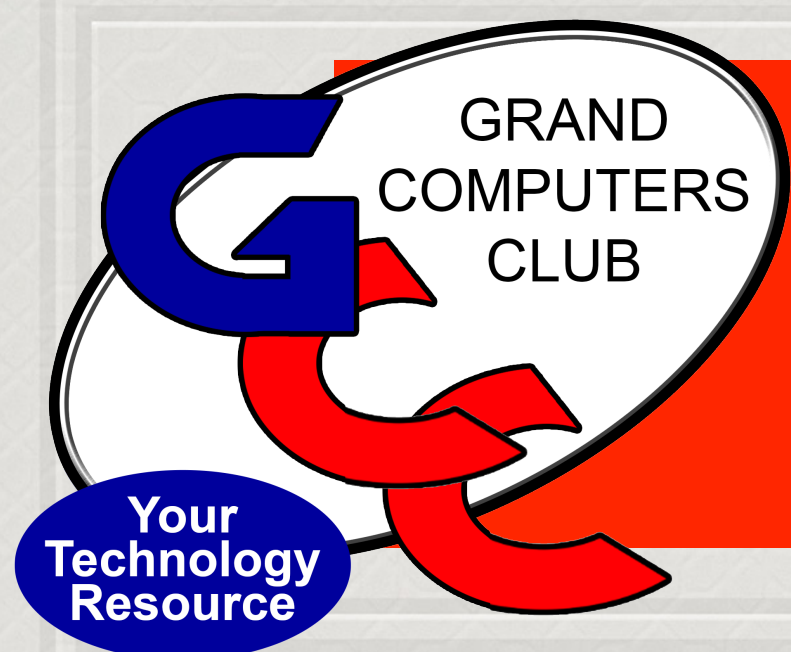

Presenters

- *Dan Wallen - current Tech Help Director, past VP of the club and Zona Wyverd user*
- *Clay Stephens - Tech Helper, future Tech Help Director and Zona Wyverd user*
- *Ed Arnold - GCC club member, active on GCC Facebook page and Zona Wyverd user*
- *Welcome and let's get started!*

Wrapping it Up

- *Options for internet service*
- *My reasons for switching*

Q & A

THANK YOU FOR ATTENDING TODAY

MANY THANKS TO OUR PANELISTS

***JOIN US AT THE COMPUTERS CLUB FOR THE MANY
SERVICES THAT ARE OFFERED !***
