# TODAY'S AGENDA

**What is a Web Browser?**

**What are the major ones?**

**Bookmarks and Popups**

**Zooming and Printing**

**The future**

**Using the Grand Computers Website**

**Q&A**

# What exactly is a “Web Browser”

A **web browser** (also referred to as an **Internet browser** or simply a **browser**) is [application software](#) for accessing the [World Wide Web](#) or a local website. When a [user](#) requests a [web page](#) from a particular [website](#), the web browser retrieves the necessary content from a [web server](#) and then displays the page on the user's device.

# The first Web Browsers

1993 was a landmark year with the release of [Mosaic](#), credited as "the world's first popular browser". Its innovative [graphical user interface](#) made the World Wide Web system easy to use and thus more accessible to the average person. This, in turn, sparked the Internet boom of the 1990s, when the Web grew at a very rapid rate. [Marc Andreessen](#), the leader of the Mosaic team, soon started his own company, [Netscape](#), which released the Mosaic-influenced [Netscape Navigator](#) in 1994. Navigator quickly became the [most popular](#) browser.

# The first Web Browsers

[Microsoft](#) debuted [Internet Explorer](#) in 1995, leading to a [browser war](#) with Netscape. Within a few years, Microsoft gained a dominant position in the browser market for two reasons: it bundled Internet Explorer with its popular [Windows operating system](#) and did so as [freeware](#) with no restrictions on usage. The market share of Internet Explorer peaked at over 95% in the early 2000s.[\[19\]](#)

# The first Web Browsers

In 1998, Netscape launched what would become the [Mozilla Foundation](#) to create a new browser using the [open source](#) software model. This work evolved into the [Firefox](#) browser, first released by Mozilla in 2004. Firefox market share peaked at 32% in 2010.

# The first Web Browsers

[Apple](#) released its [Safari](#) browser in 2003. Safari remains the dominant browser on Apple devices, though it did not become popular elsewhere

# The first Web Browsers

Google debuted its Chrome browser in 2008, which steadily took market share from Internet Explorer and became the most popular browser in 2012. Chrome has remained dominant ever since

# The first Web Browsers

Microsoft released its [Edge](#) browser in 2015 as part of the [Windows 10](#) release

# What's the Difference Between a Web Browser and a "Search Engine" ?

A web browser is not the same thing as a [search engine](#), though the two are often confused. A search engine is a website that provides [links](#) to other websites. However, to connect to a website's server and display its web pages, a user must have a web browser installed.

# **Google**

Is a company and it's original product was  
the Google Search Engine

But as mentioned earlier, it then developed  
it's own browser, Chrome

# **Microsoft**

Originally had Internet Explorer , then replaced it recently with Edge

Edge is based on Chrome and looks very similar

Microsoft also has their own Search Engine, called Bing

These various browsers were developed  
back “in the day” when most users  
accessed the Web from either a PC or a  
Mac

That meant that users had a fairly large screen, a full keyboard, and a mouse

This became more complicated with the rise of handheld devices, i.e. smart phones

Now these browsers had to adapt to the much smaller screen sizes of smart phones, and the usage of a touch screen

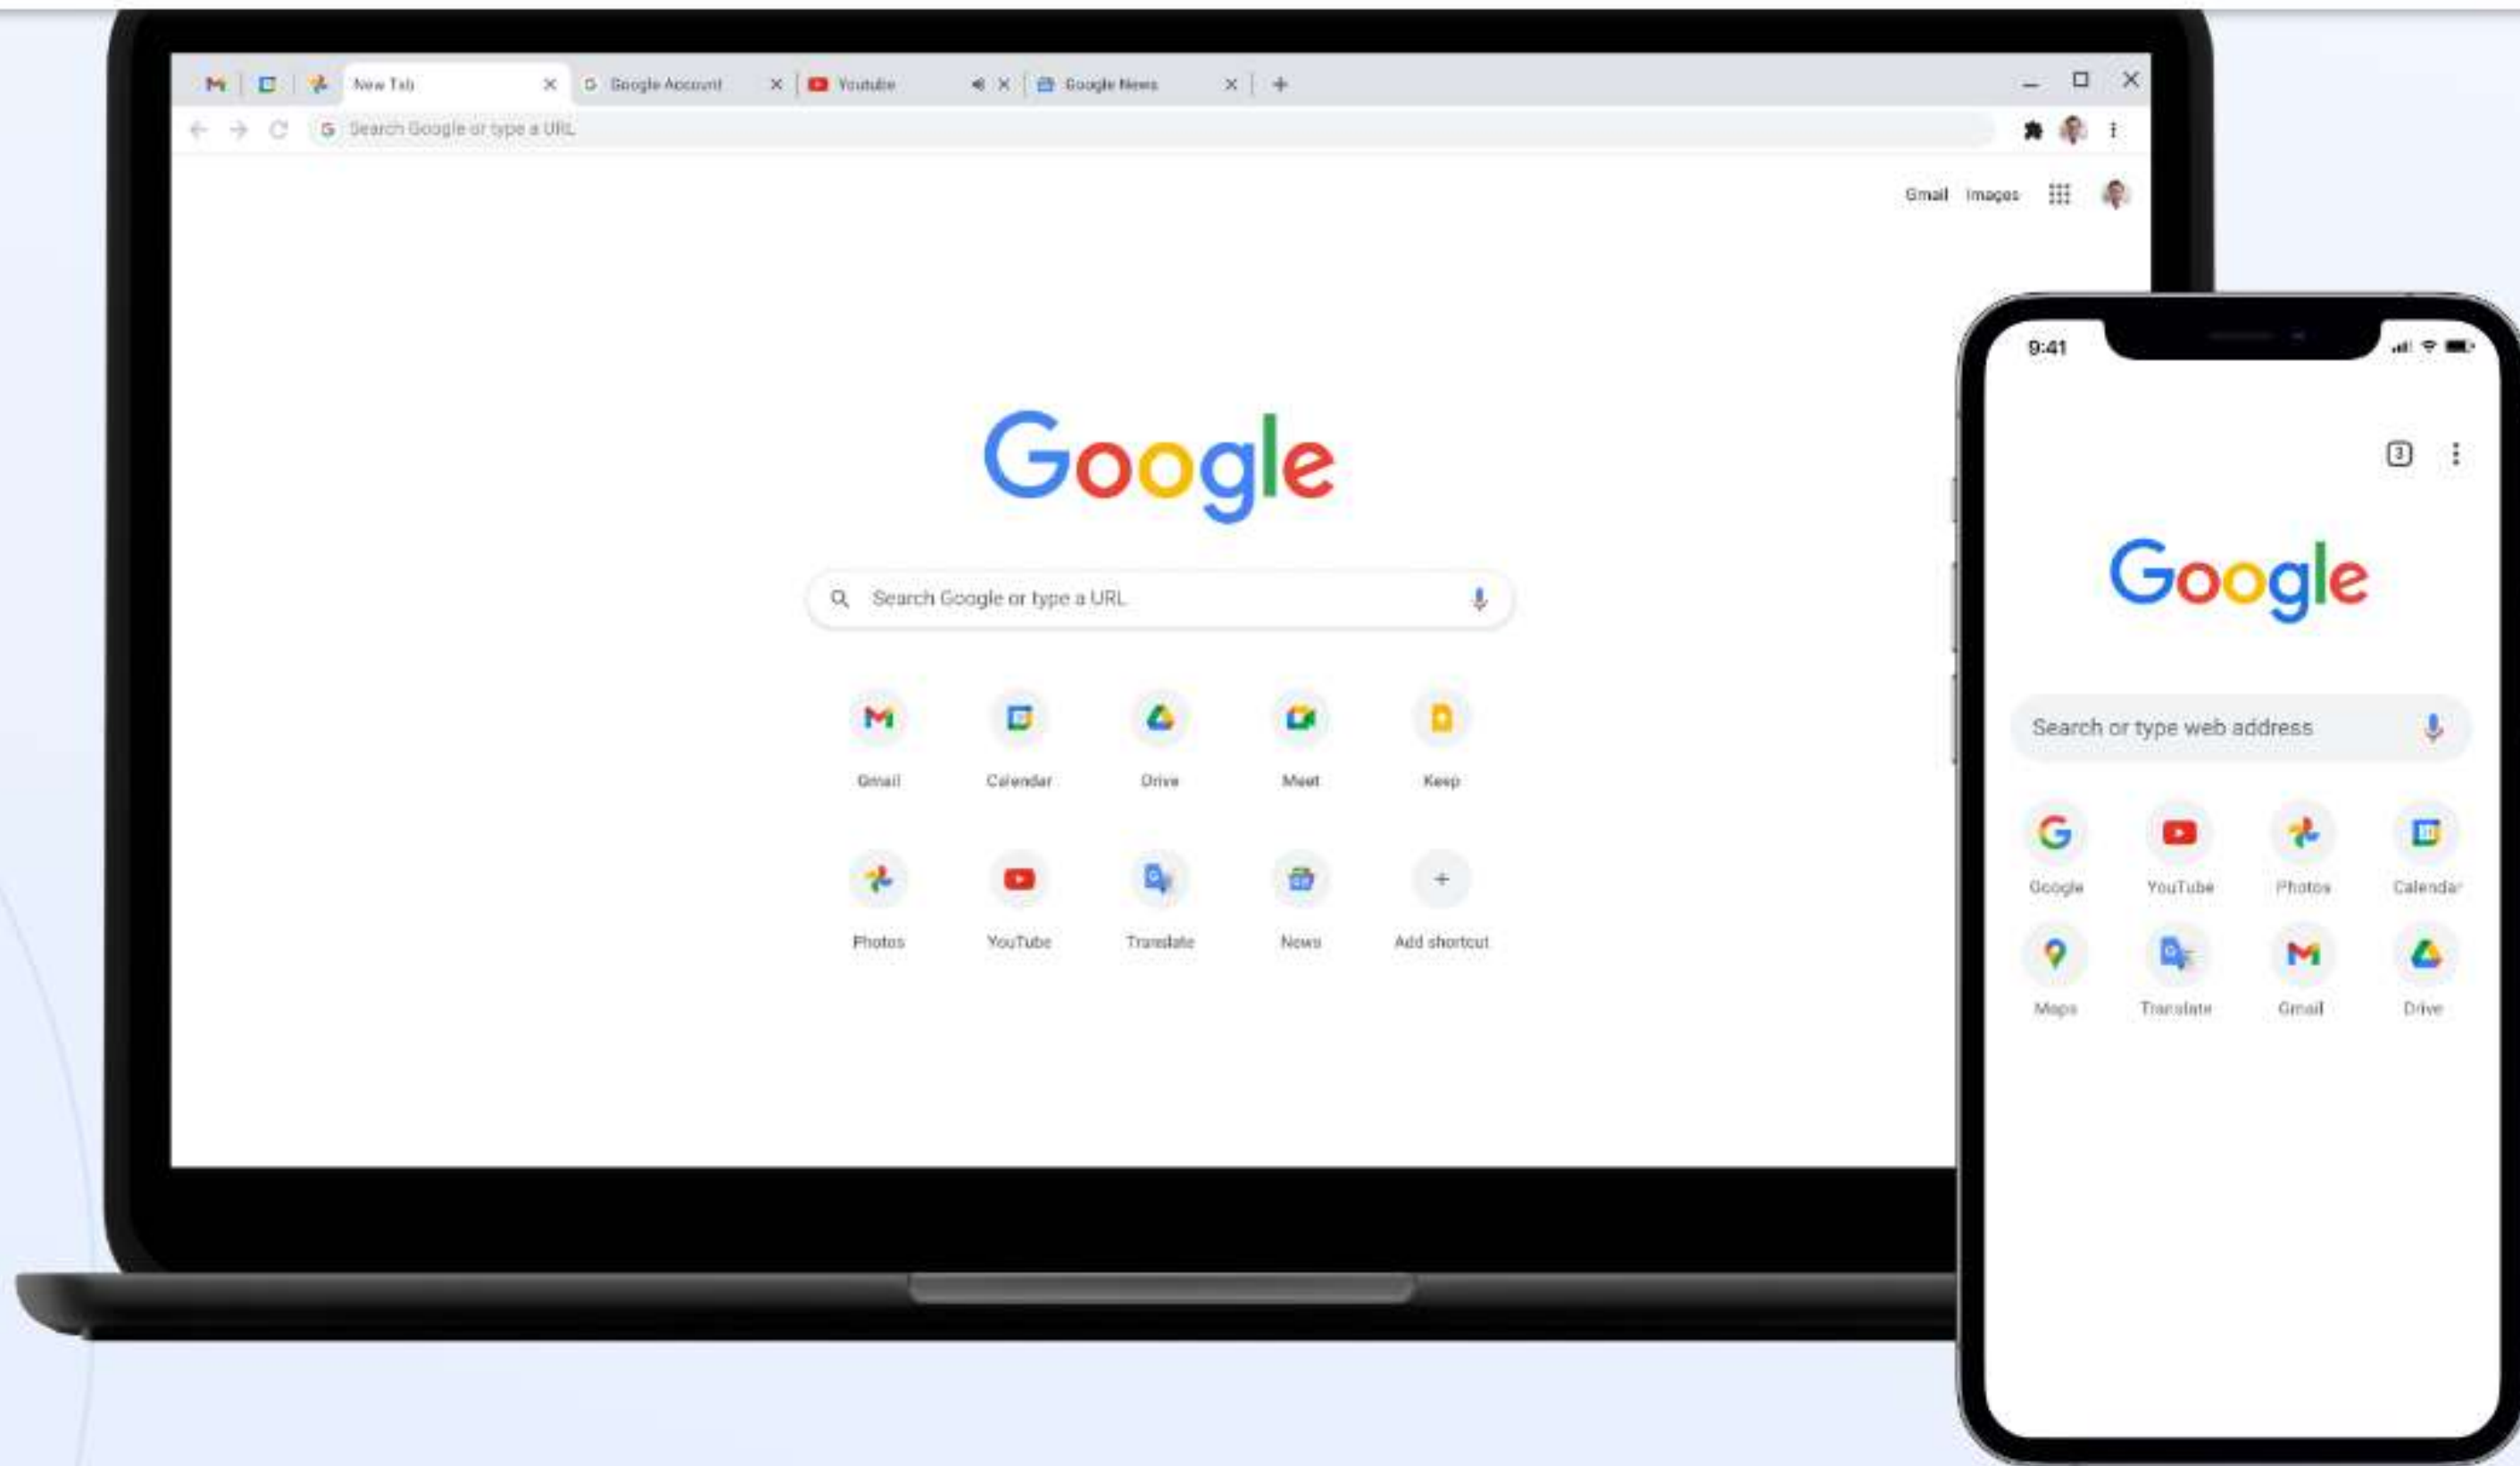

Today the browsers have mostly the same capabilities on a PC/Mac or Smart Phone

But

Things look different on the phone

Some capabilities of the browser are not shown by default on the phone because there is just not enough room; you may have to scroll up or down, or in some cases, swipe left or right, to find more options

**Each company has a default  
browser for their devices**

Apple has Safari

Windows PCs have Edge

Android devices have Chrome

**What if I don't want to use  
the default on my device ?**

You can install Chrome, and most people do,  
on Windows PCs

You can also install Chrome on an Apple  
product

**What if I don't want to use  
the default on my device ?**

Many Windows/PC users still use Firefox  
It is something they are familiar with and still  
is very good

## **Note for Windows 11**

With Windows 11, Microsoft is really pushing  
users to adopt Edge

It is integrated into many aspects of 11 and  
you have to “opt out” not to use it

# What is a Bookmark ?

## Here's a formal definition

Using a World Wide Web [browser](#), a bookmark is a saved link to a Web [page](#) that has been added to a list of saved links. When you are looking at a particular Web site or [home page](#) and want to be able to quickly get back to it later, you can create a bookmark for it. You can think of your browser as a book full of (millions of ) Web pages and a few well-placed bookmarks that you have chosen. The list that contains your bookmarks is the "bookmark list" (and sometimes it's called a "hotlist.")

# **Bookmarks vs Favorites**

## **Are they the same ?**

Bookmarks and Favorites are very similar

Some browsers use them interchangeably

Their function is to allow you to save a “placeholder” for accessing a web site  
you frequently use

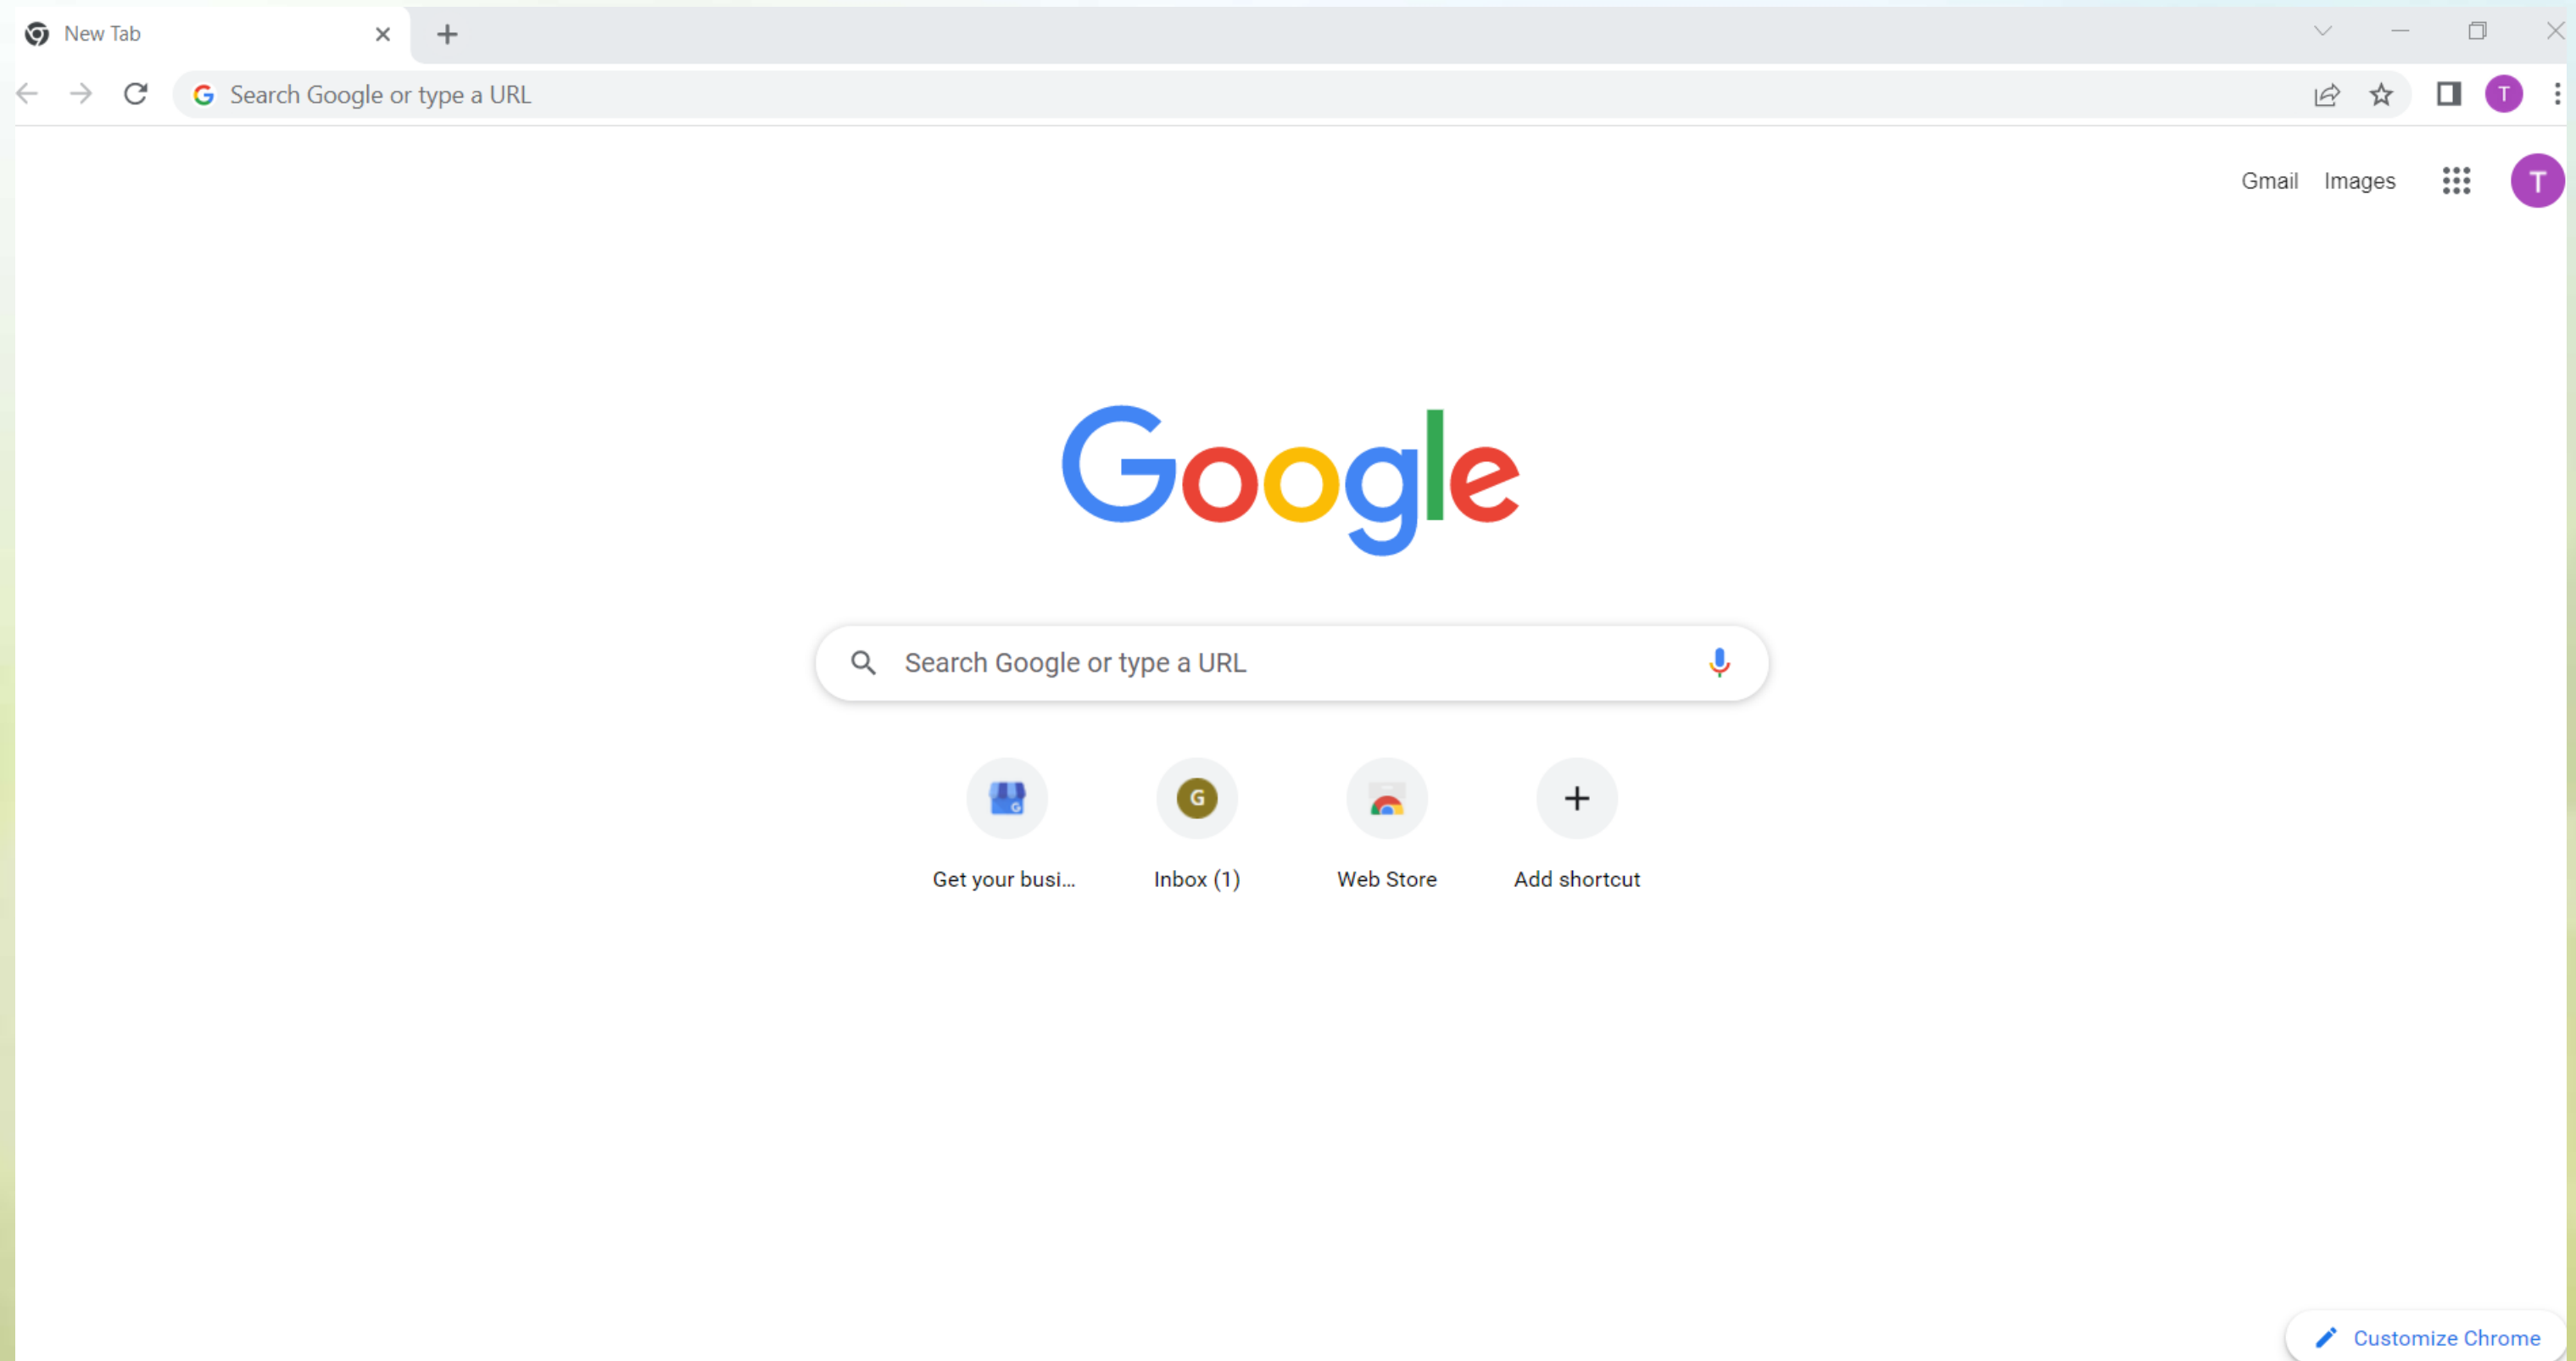

Either one speeds up the process because you don't have to search , you just  
click on the “placeholder”

# **Where do I put my bookmarks**

For Google Chrome, bookmarks show up on the  
Bookmarks “Bar”

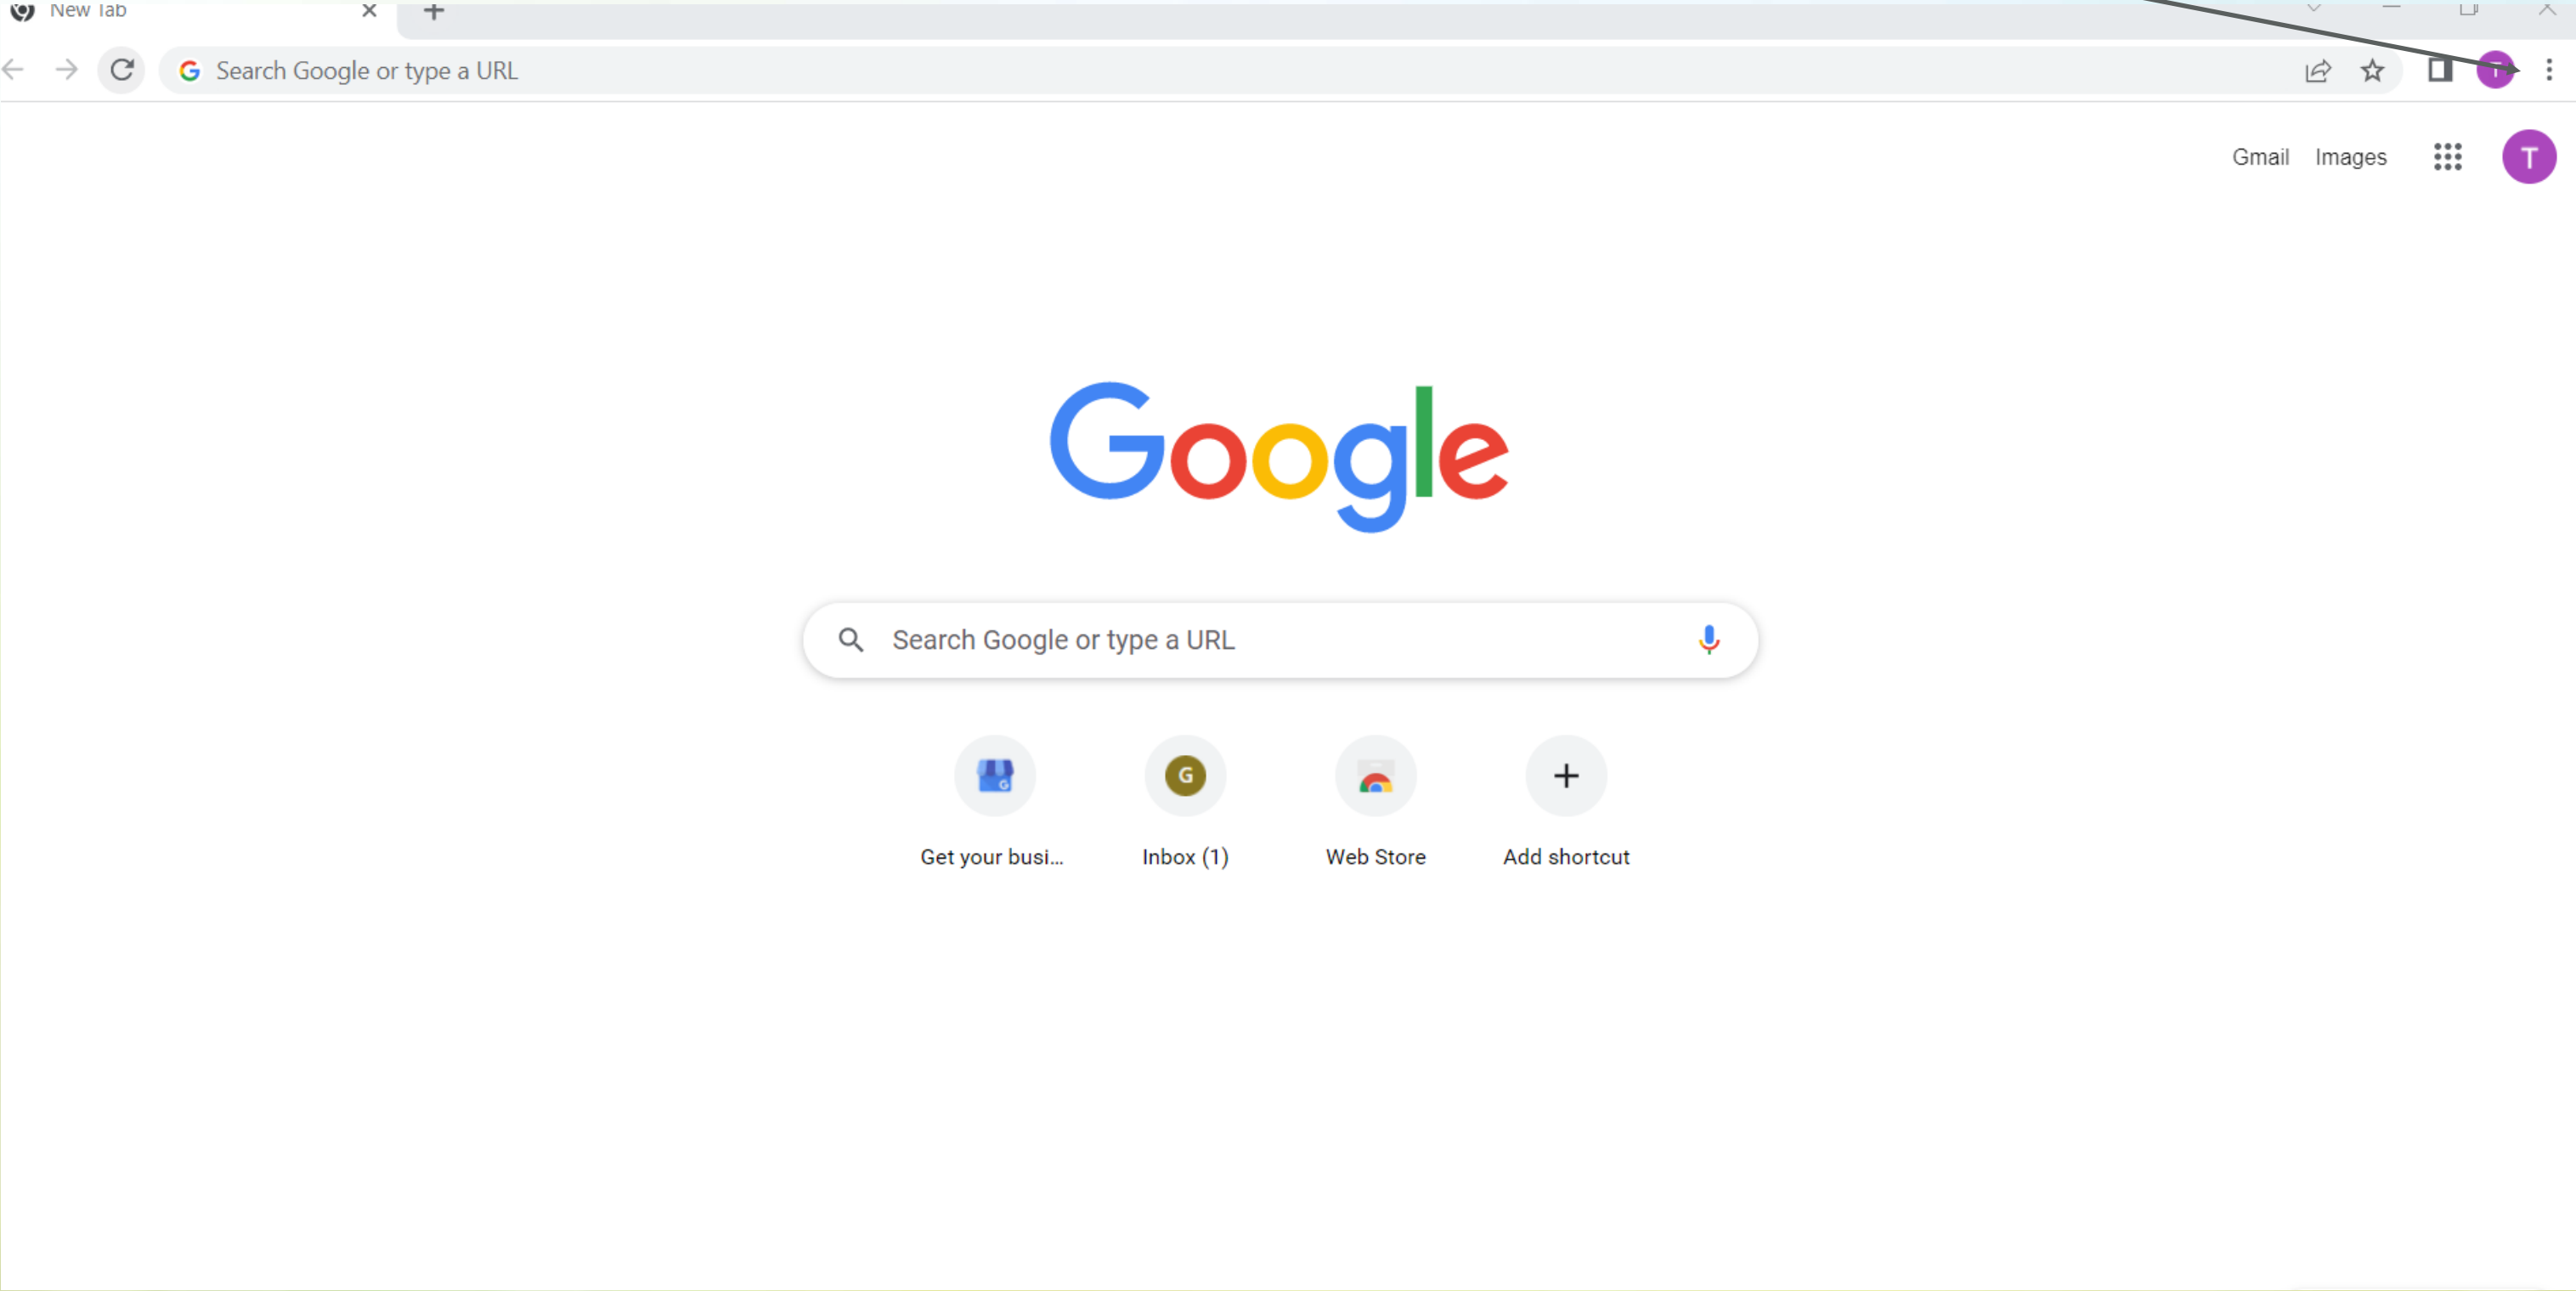

# Here is Google Chrome on a Windows 11 Laptop

## This is plain vanilla with no bookmarks

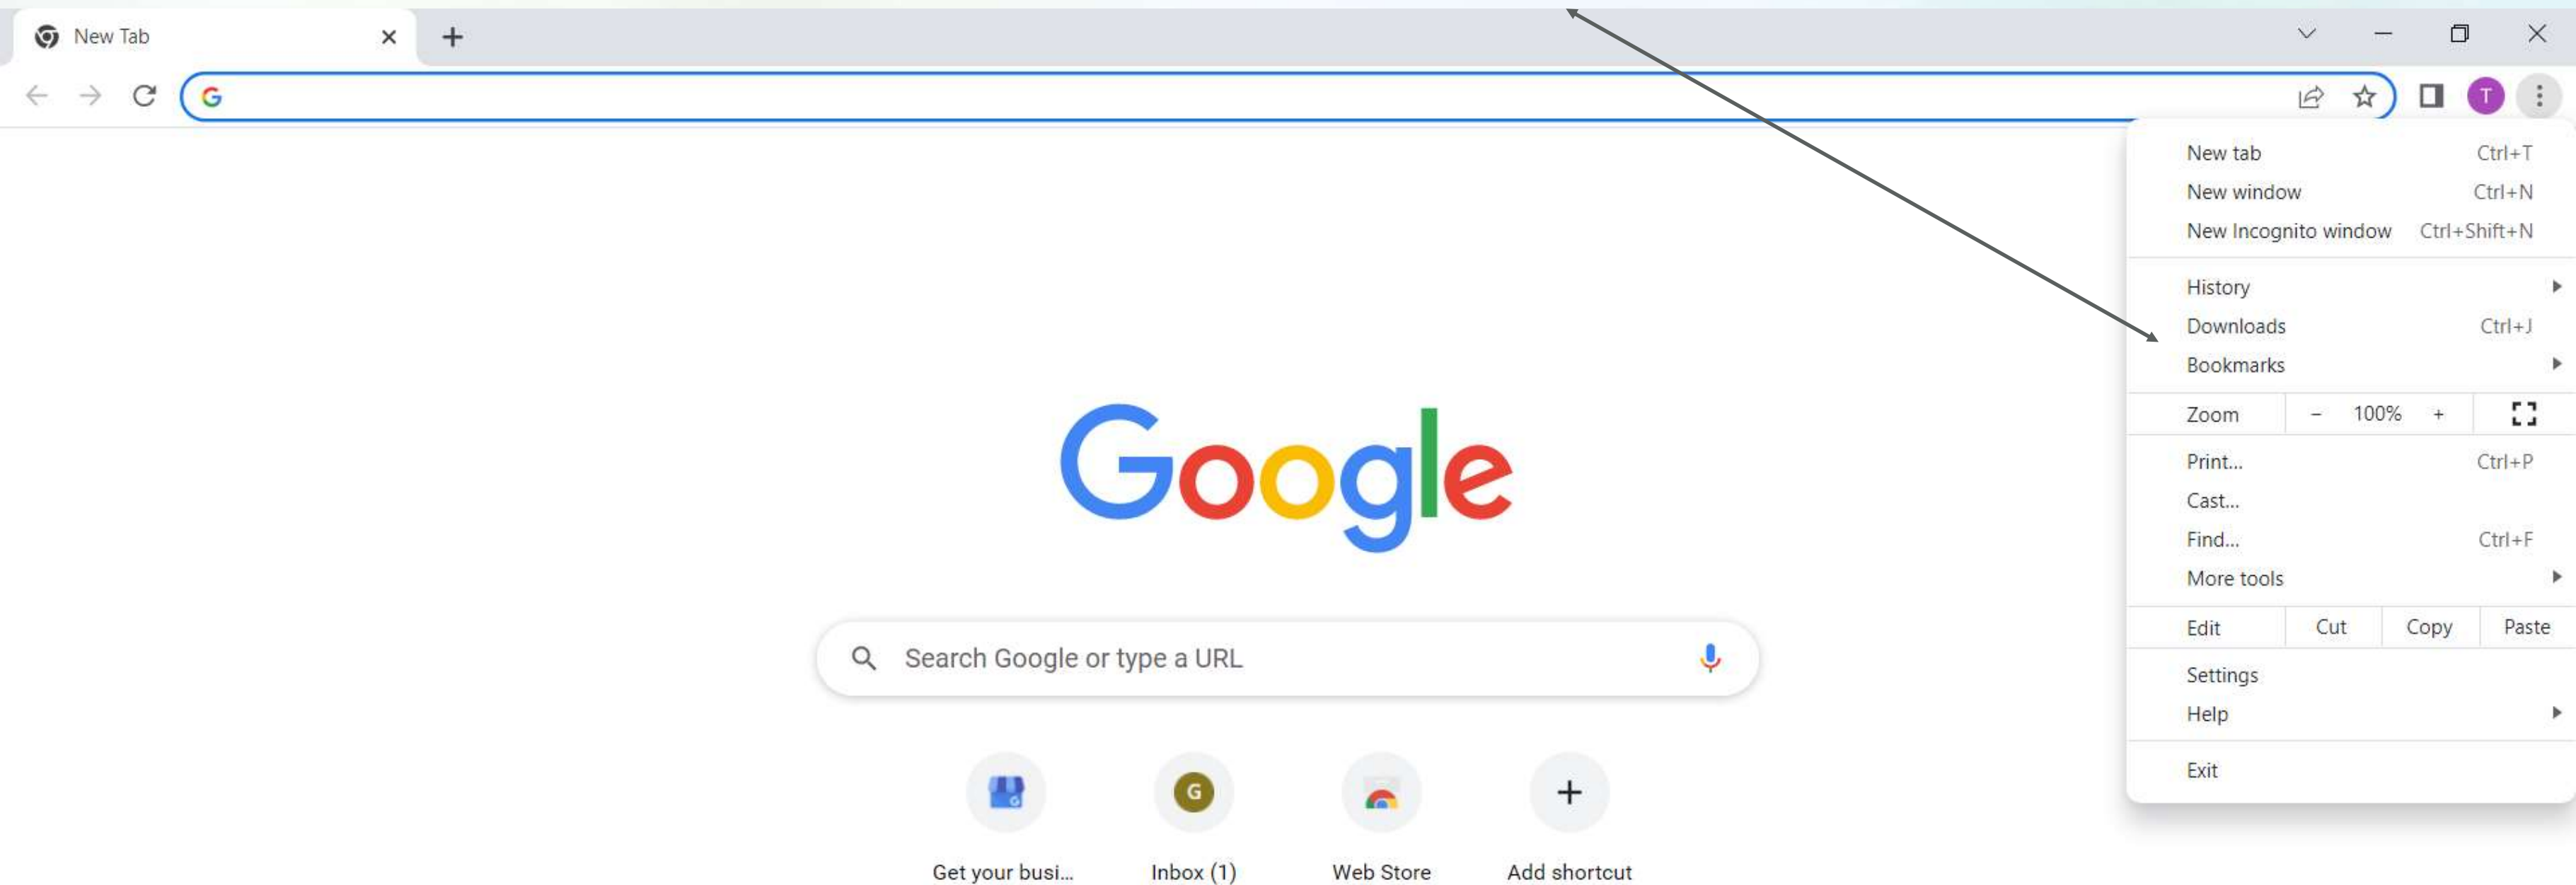

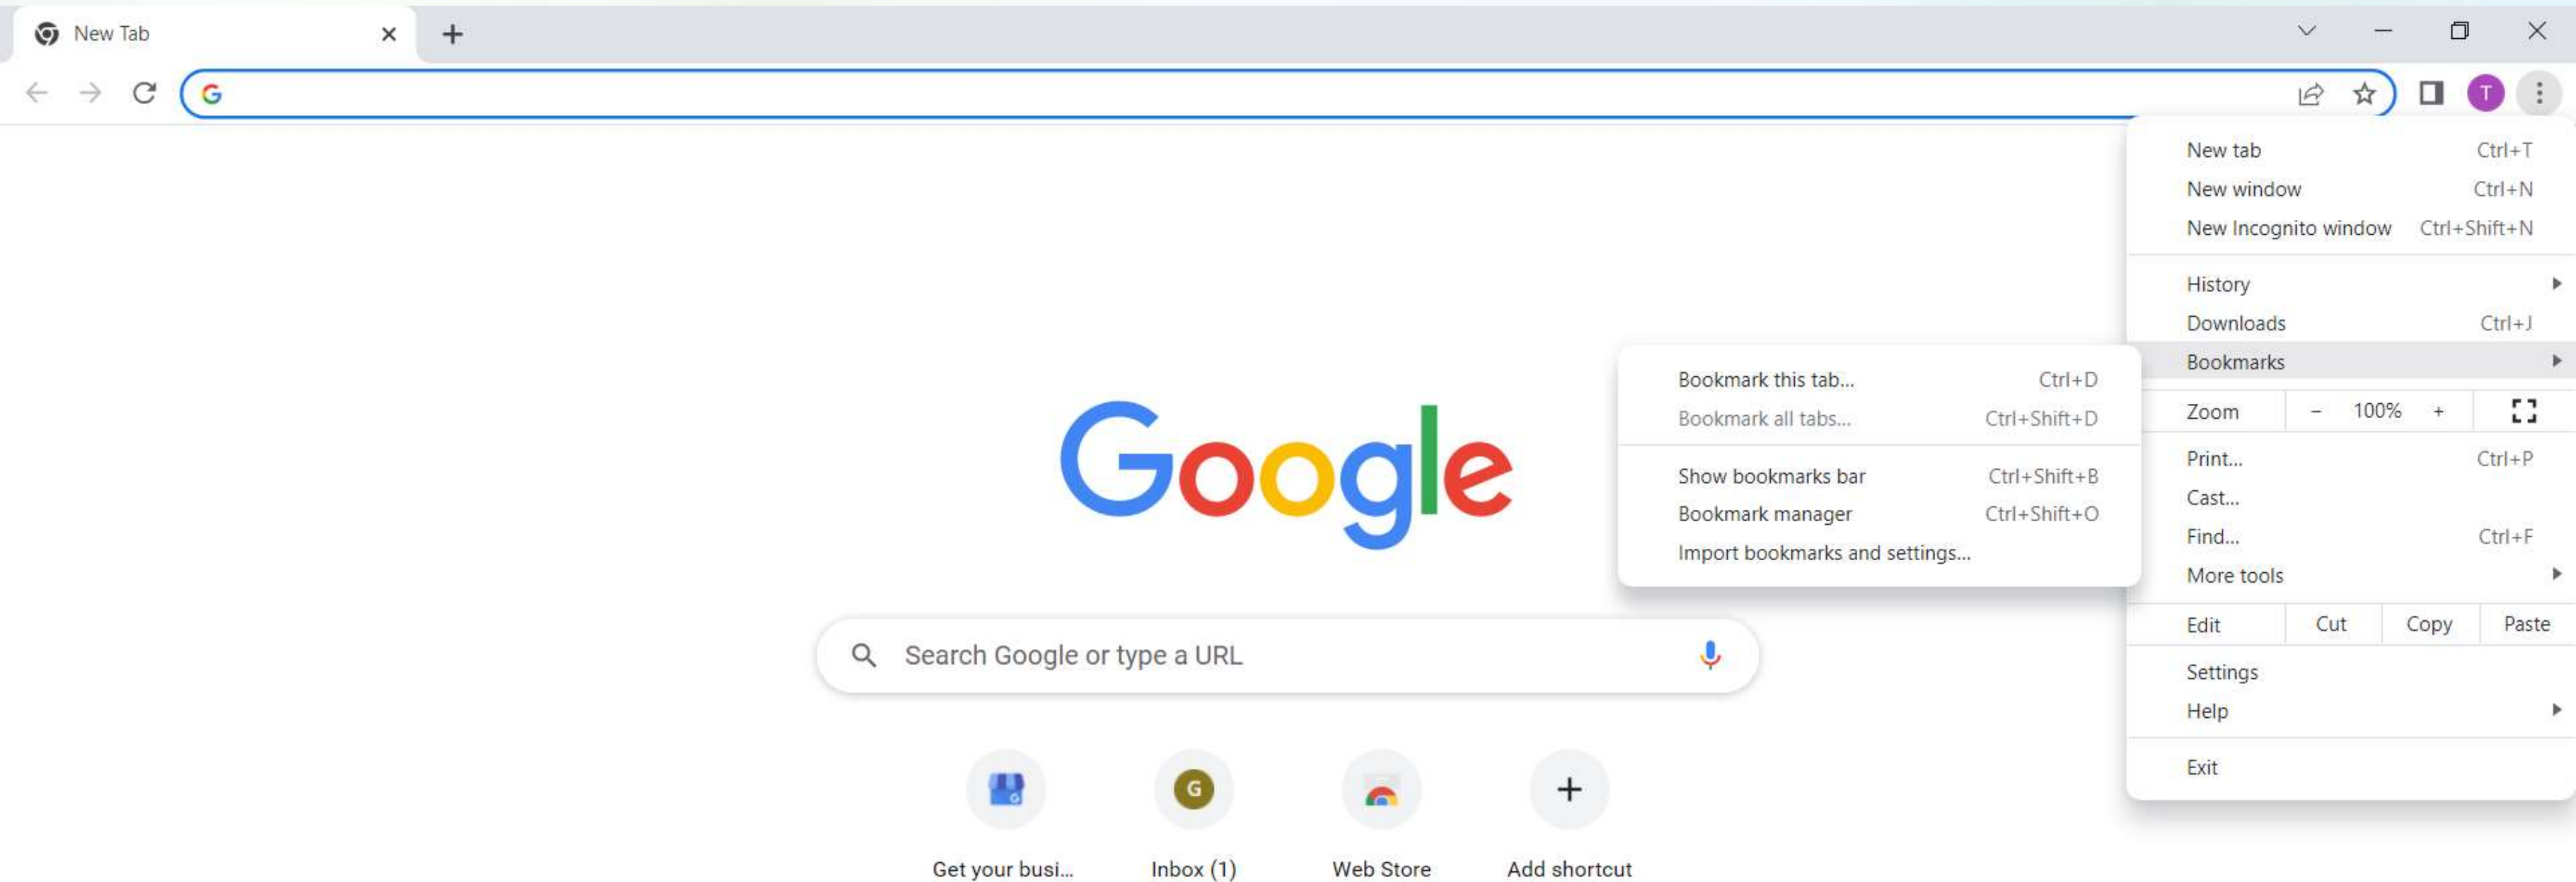

Click on the three dots

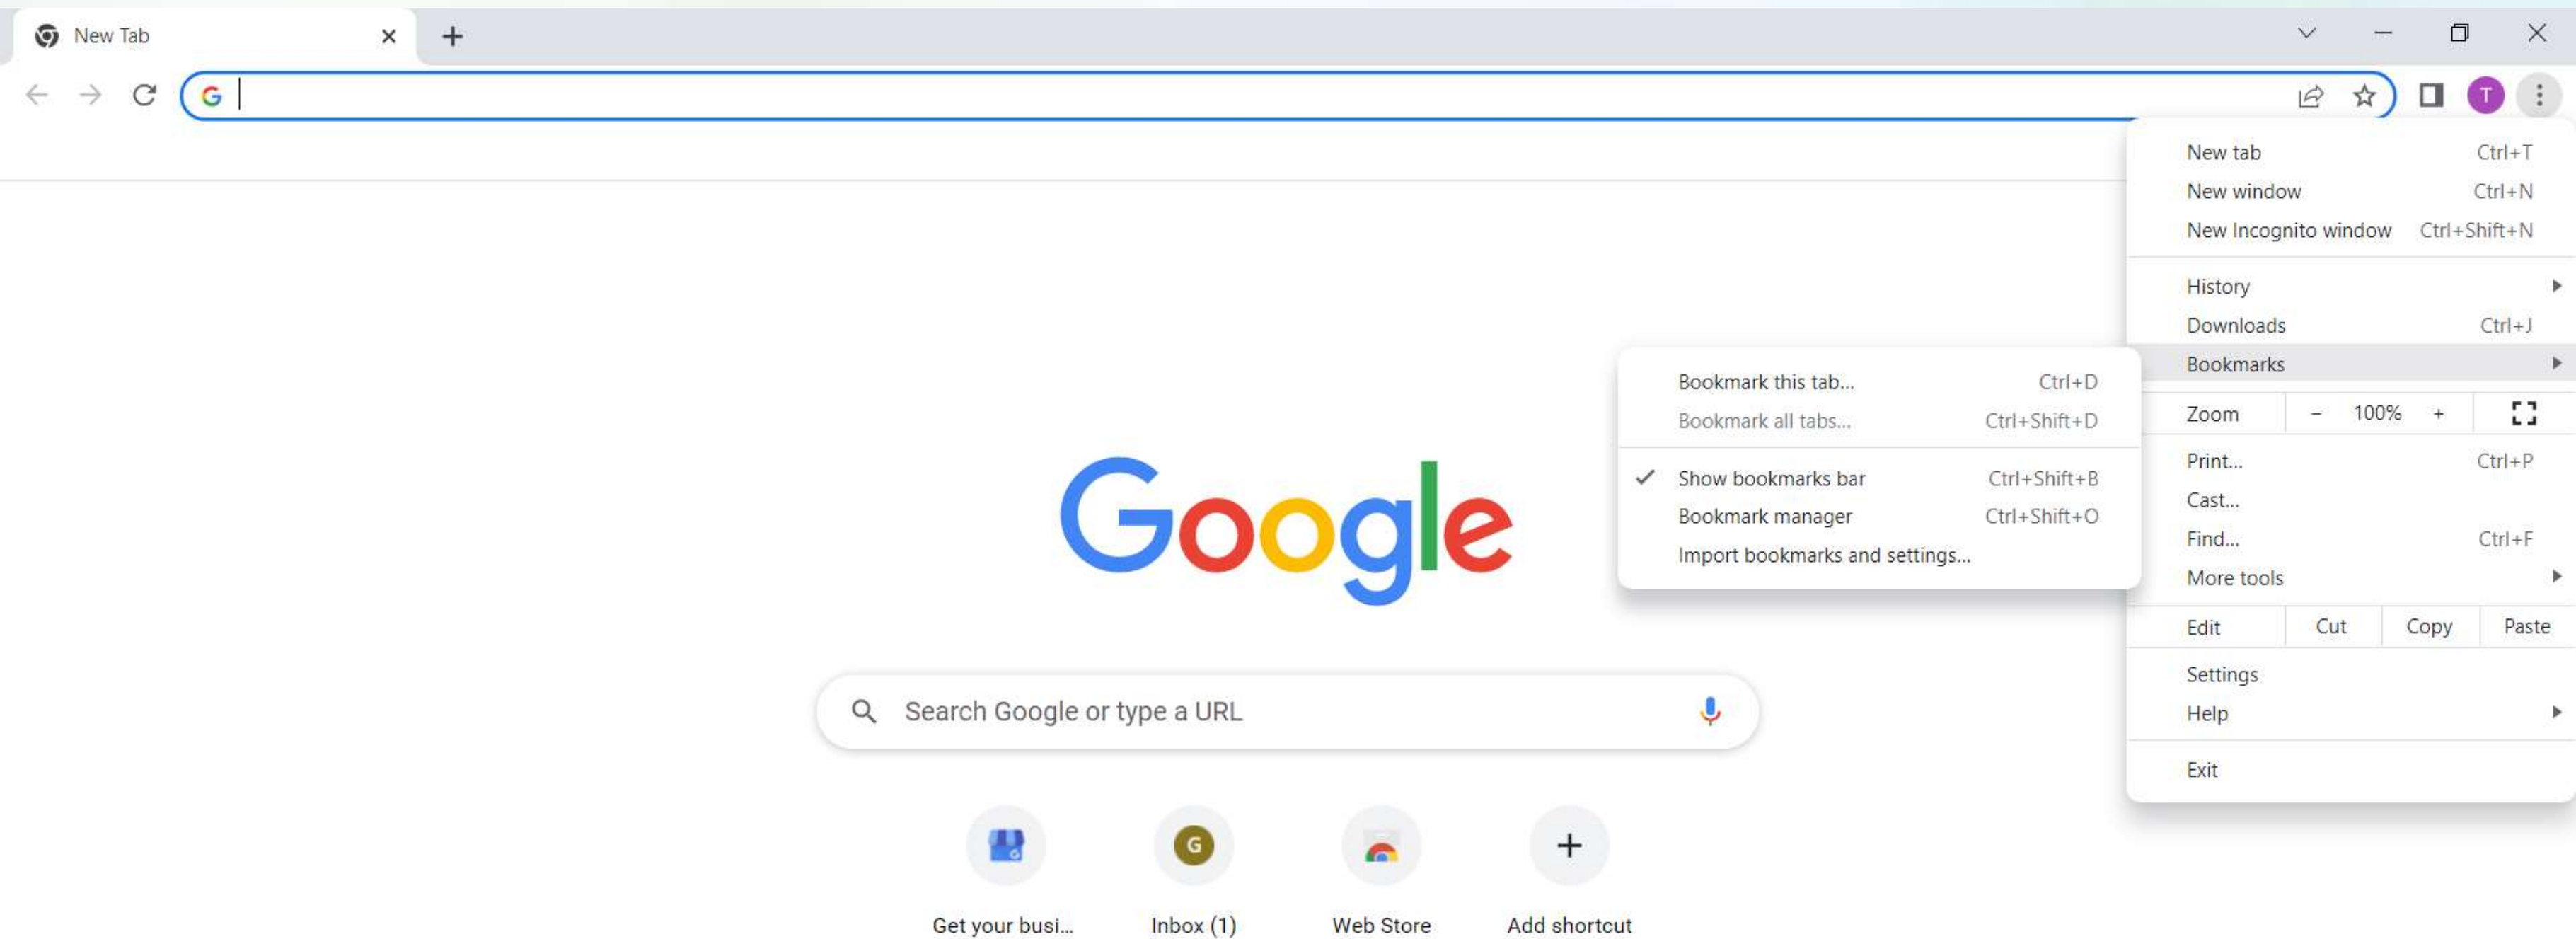

And this little window pops up on the left – see where it says **Bookmarks**, we'll click on that

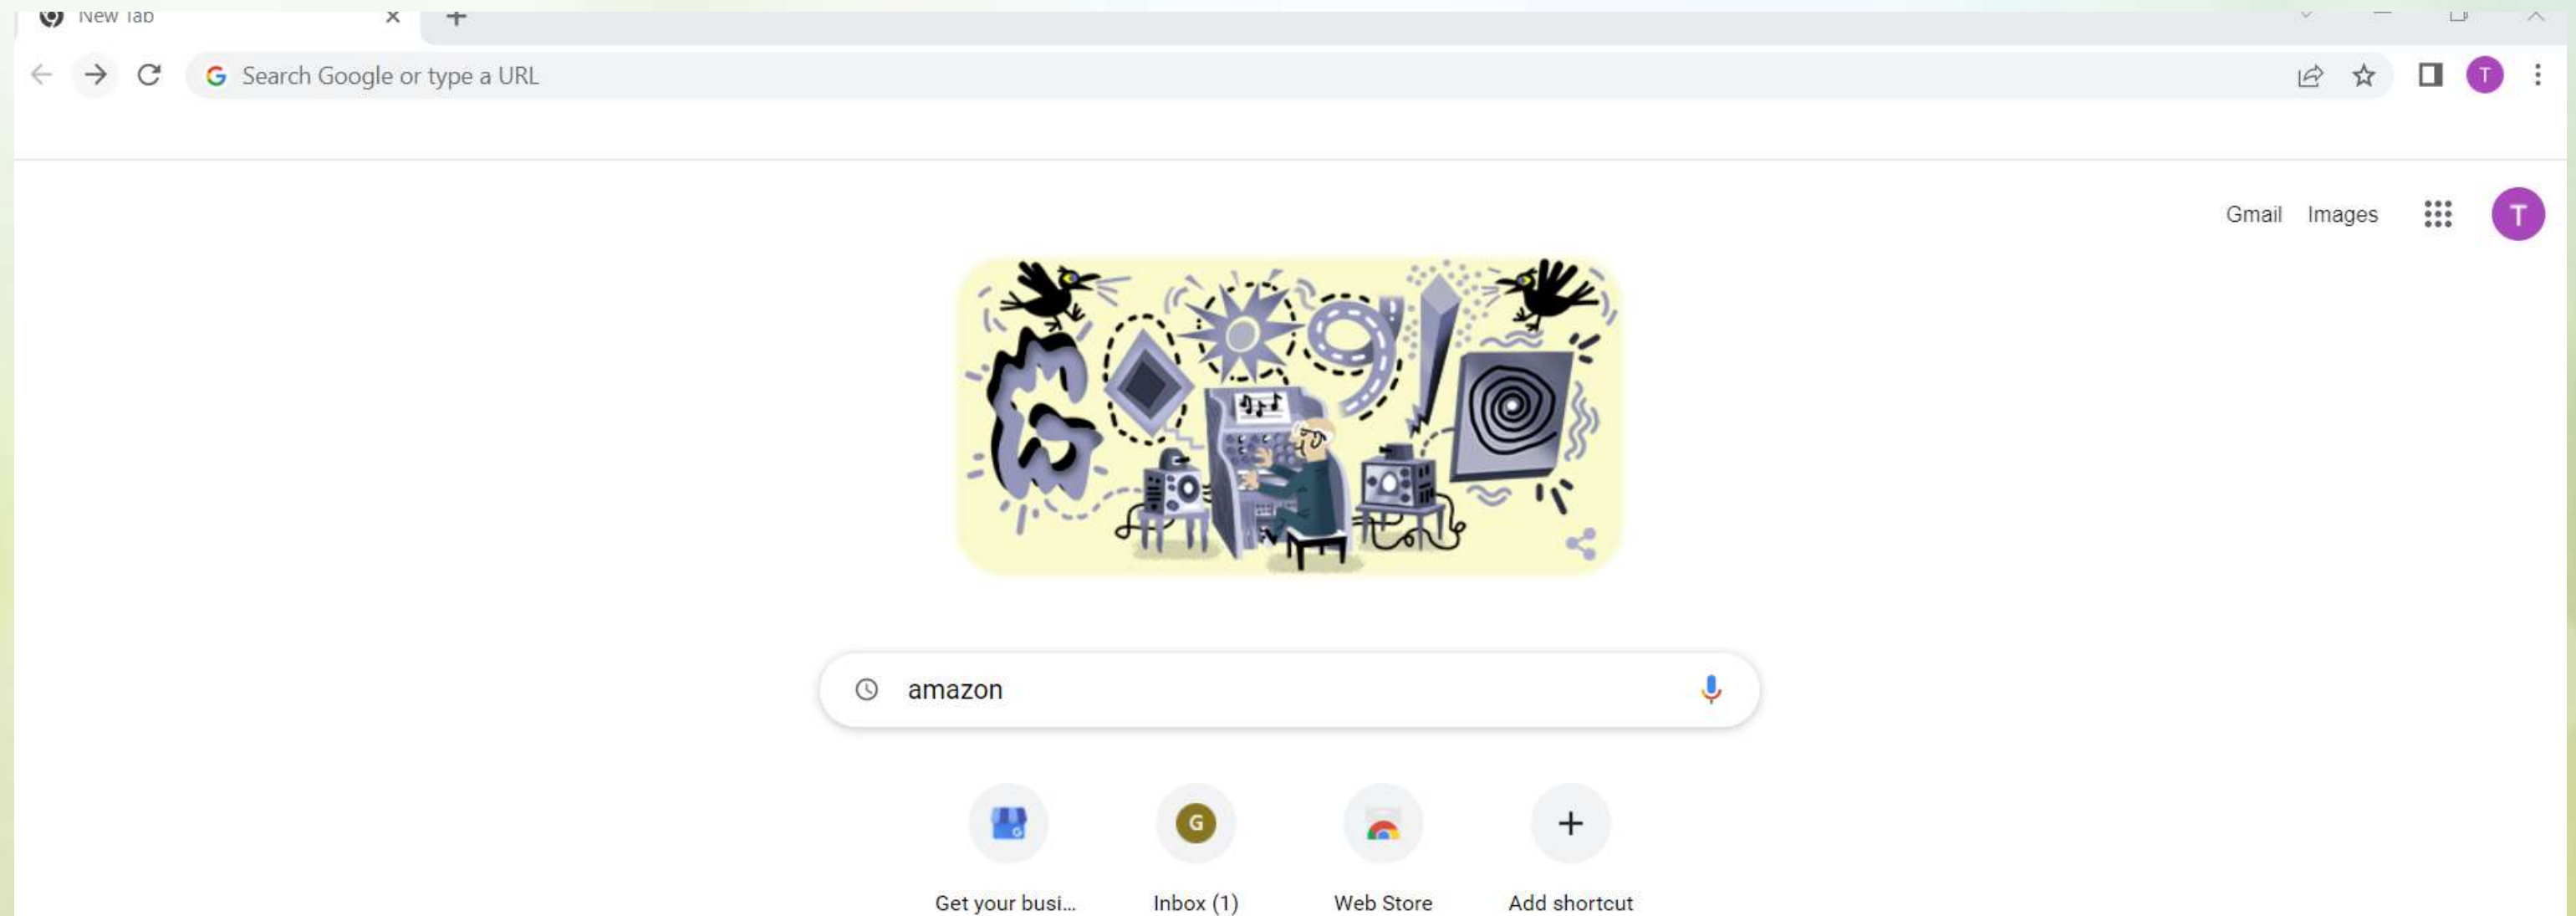

And then you get options to Bookmark this tab and more importantly, show Bookmarks bar

I clicked "Show bookmarks bar" but nothing happens  
That's because I don't have any bookmarks yet – lets create one

Let's say I want to access Amazon a lot – first I do a search

Here is what the search shows – I will click the first entry

The screenshot shows a Google search for 'amazon'. The search bar at the top contains the word 'amazon'. Below the search bar, the results are displayed. The first result is for 'Amazon.com', which is highlighted with a blue arrow pointing to the URL 'https://www.amazon.com'. The result includes the Amazon logo, the text 'Amazon.com. Spend less. Smile more.', and a brief description: 'Free shipping on millions of items. Get the best of Shopping and Entertainment with Prime. Enjoy low prices and great deals on the largest selection of ...'. To the right of the main result, there is a detailed information box for 'Amazon.com', which includes the company's description, CEO information, stock price, and other details.

Up pops up the Amazon page – now to create a bookmark for this so I don't have to go through all this again, click the three dots again

The image shows a screenshot of a web browser displaying the Amazon.com homepage. The browser's address bar shows 'amazon.com'. The Amazon logo is in the top left, followed by a search bar and navigation links like 'Hello, Sign in Account & Lists', 'Returns & Orders', and 'Cart'. Below the navigation bar is a horizontal menu with categories like 'All', 'Best Sellers', 'Amazon Basics', etc. The main content area features a large banner for 'Our most popular smart speaker with Alexa echo dot (3rd Gen)' with a circular image of the device. Below the banner are four promotional tiles: 'Deals on overstock sandals' (showing men's and women's sandals), 'New summer Plus styles' (showing a woman in a dress and a row of three smaller images of women in summer wear), 'Supplies for all grades' (showing school supplies for Pre-K-2nd Grade, Grades 3-6, and Grades 7-8), and 'Sign in for the best experience' (with a yellow 'Sign in securely' button). At the bottom right is a movie poster for 'THE KING OF STATEVILLE ISLAND'. An arrow from the text above points to the three-dot menu icon in the browser's top right corner.

And here is an example with lots of bookmarks on the bookmark bar

# **What about Apple users and Safari ?**

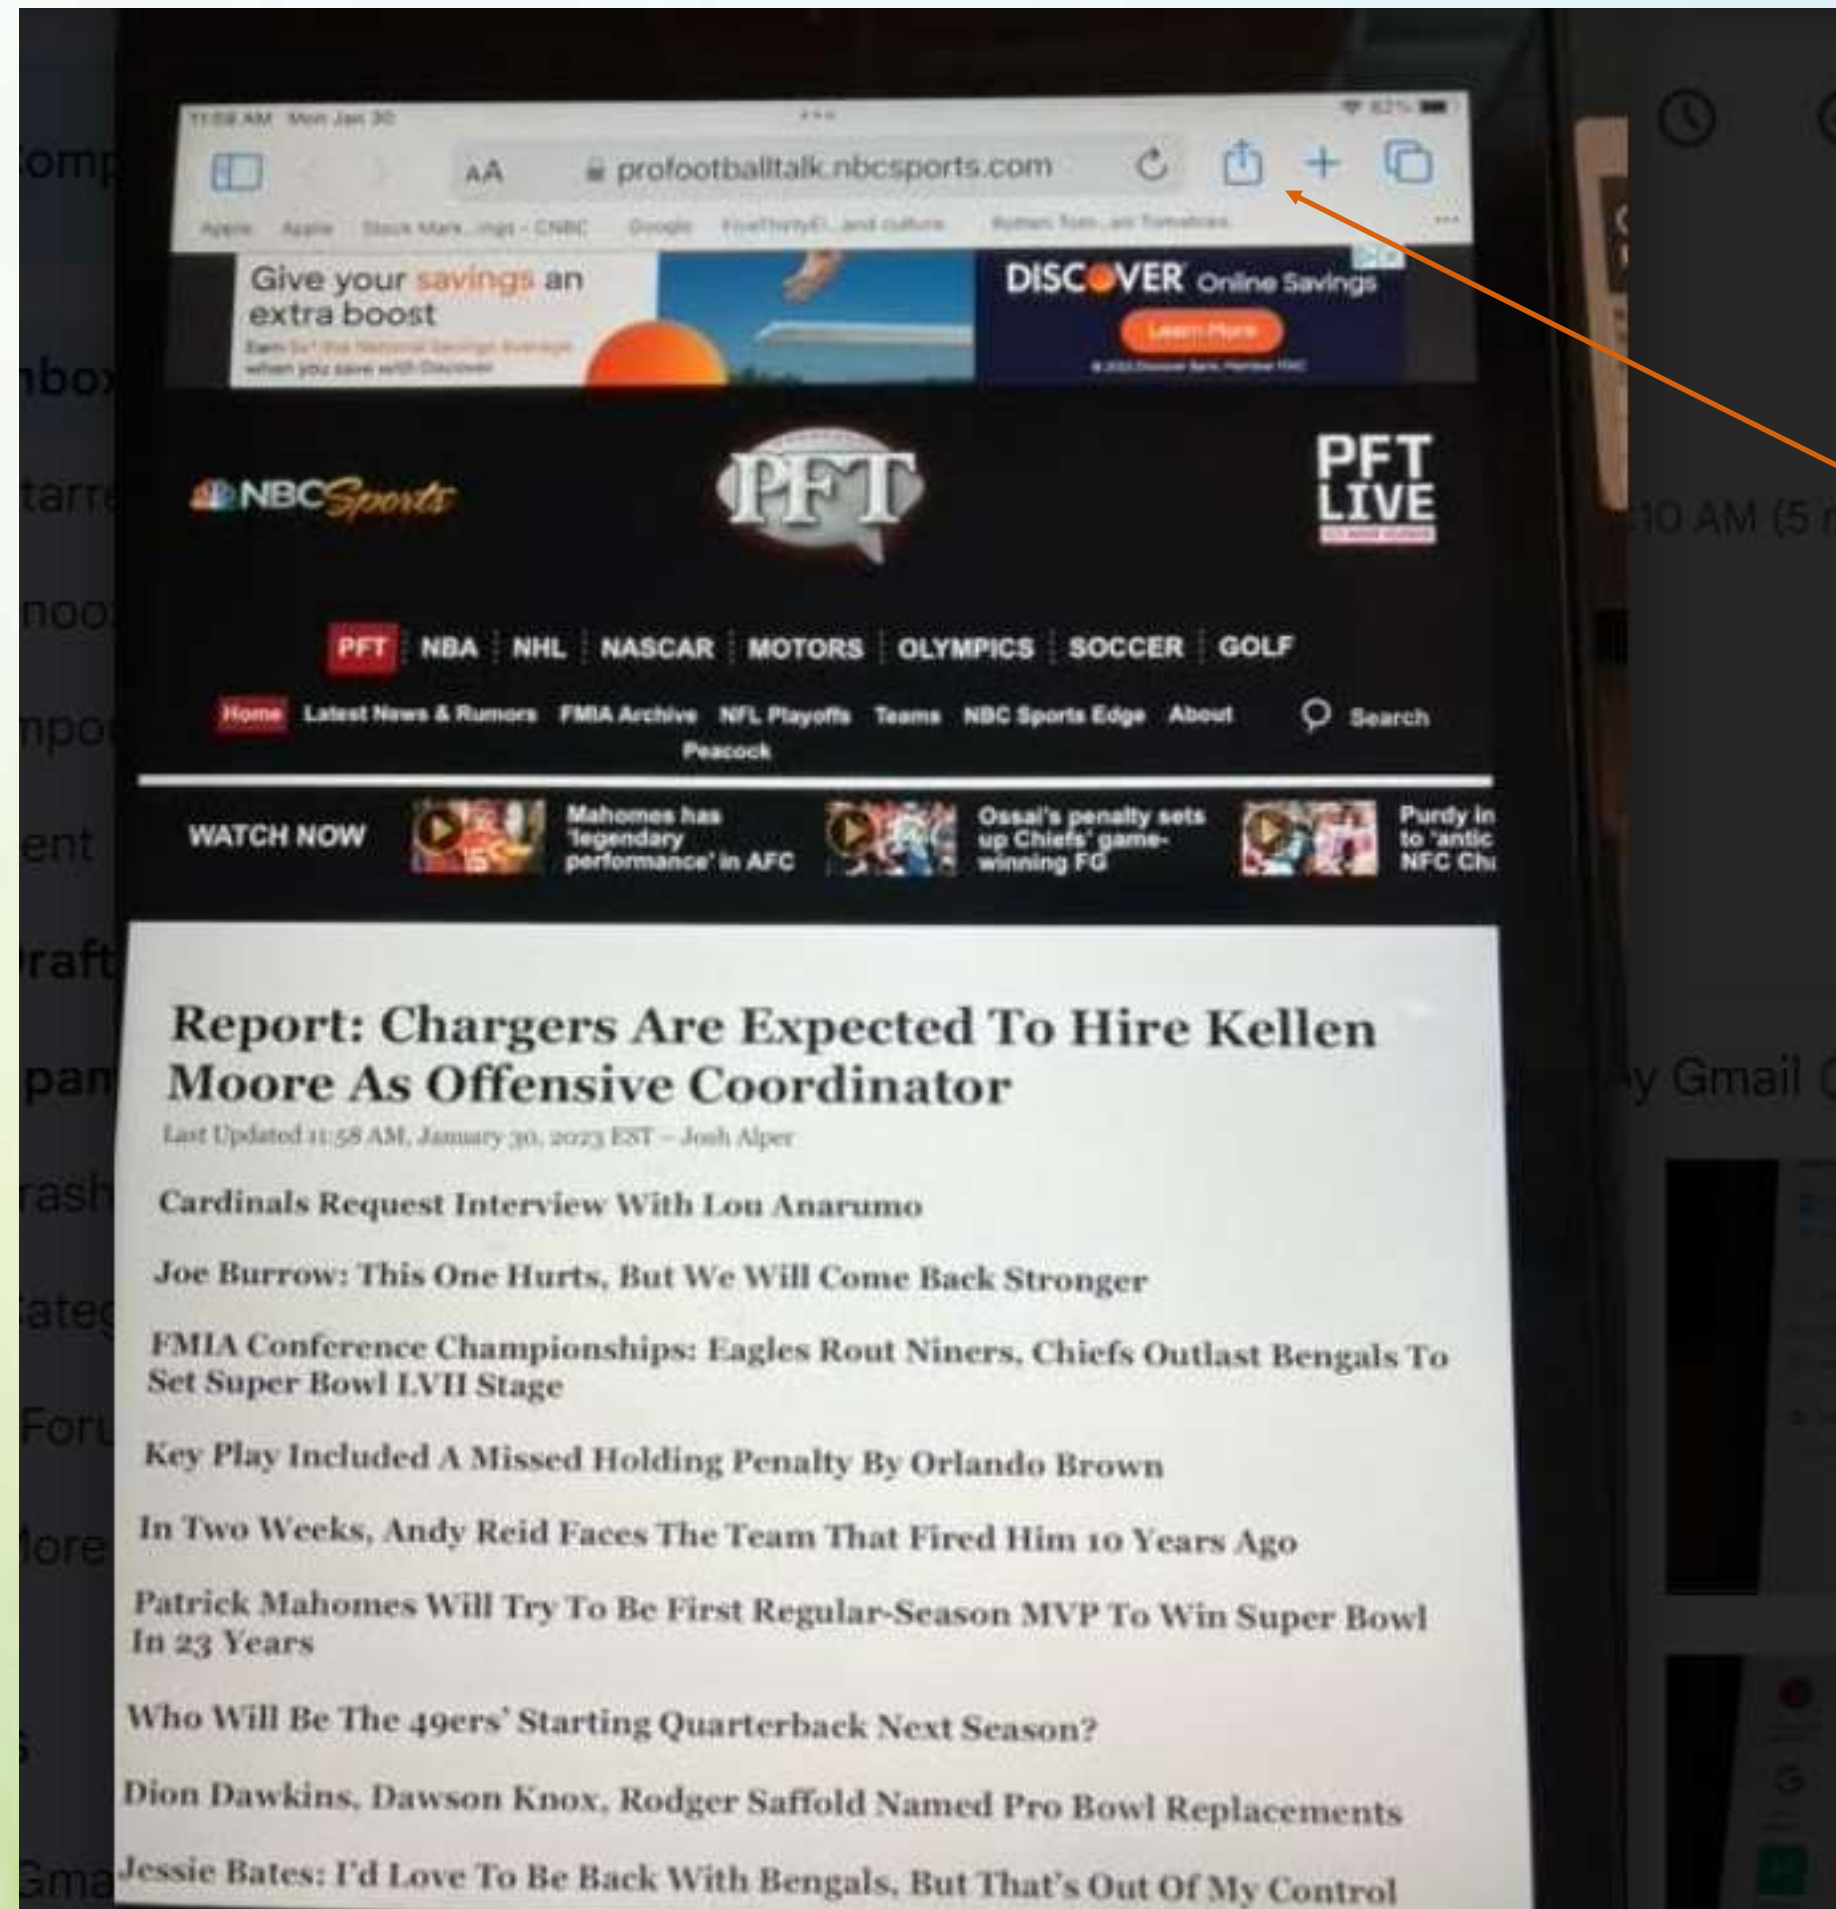

Apple Safari has the same concept but features both bookmarks and favorites

# Here is my iPad opened to Safari

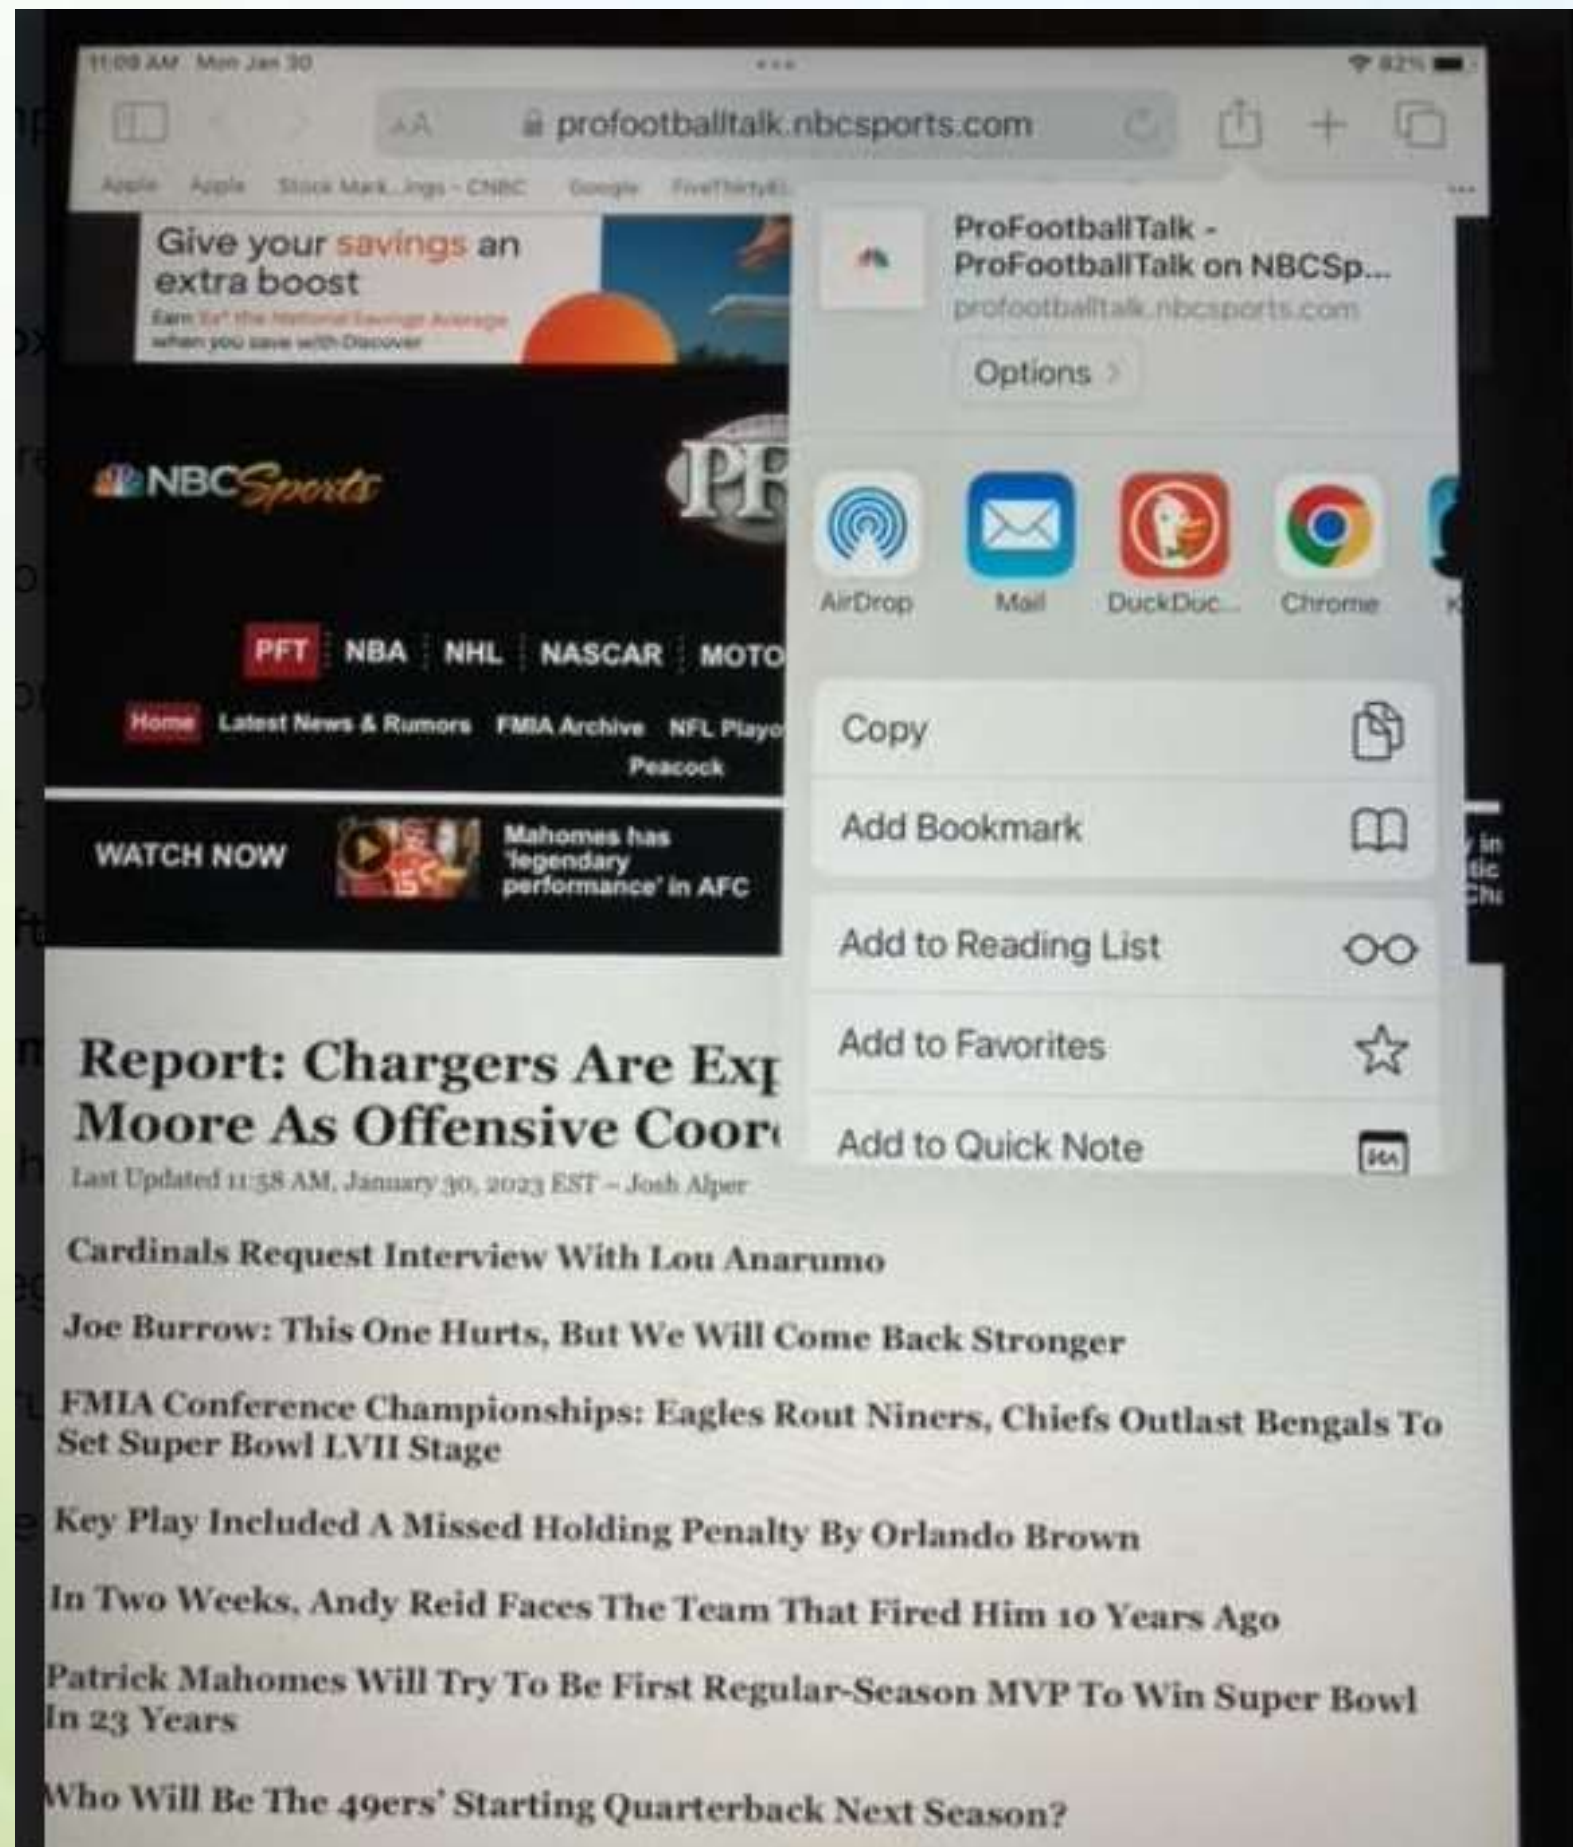

I select the web site Pro Football Talk

Here is that website

If I click on this

These choices  
show up  
I can either add  
this webpage as a  
Bookmark or as a  
Favorite

## THE BASICS OF BOOKMARKS AND FAVORITES

The bookmarks on Safari function like any other browser — you save links in it. For proper organization, you can create different folders under bookmarks to categorize your links. For instance, you can have your tech links in one folder, sports links in another, and so on.

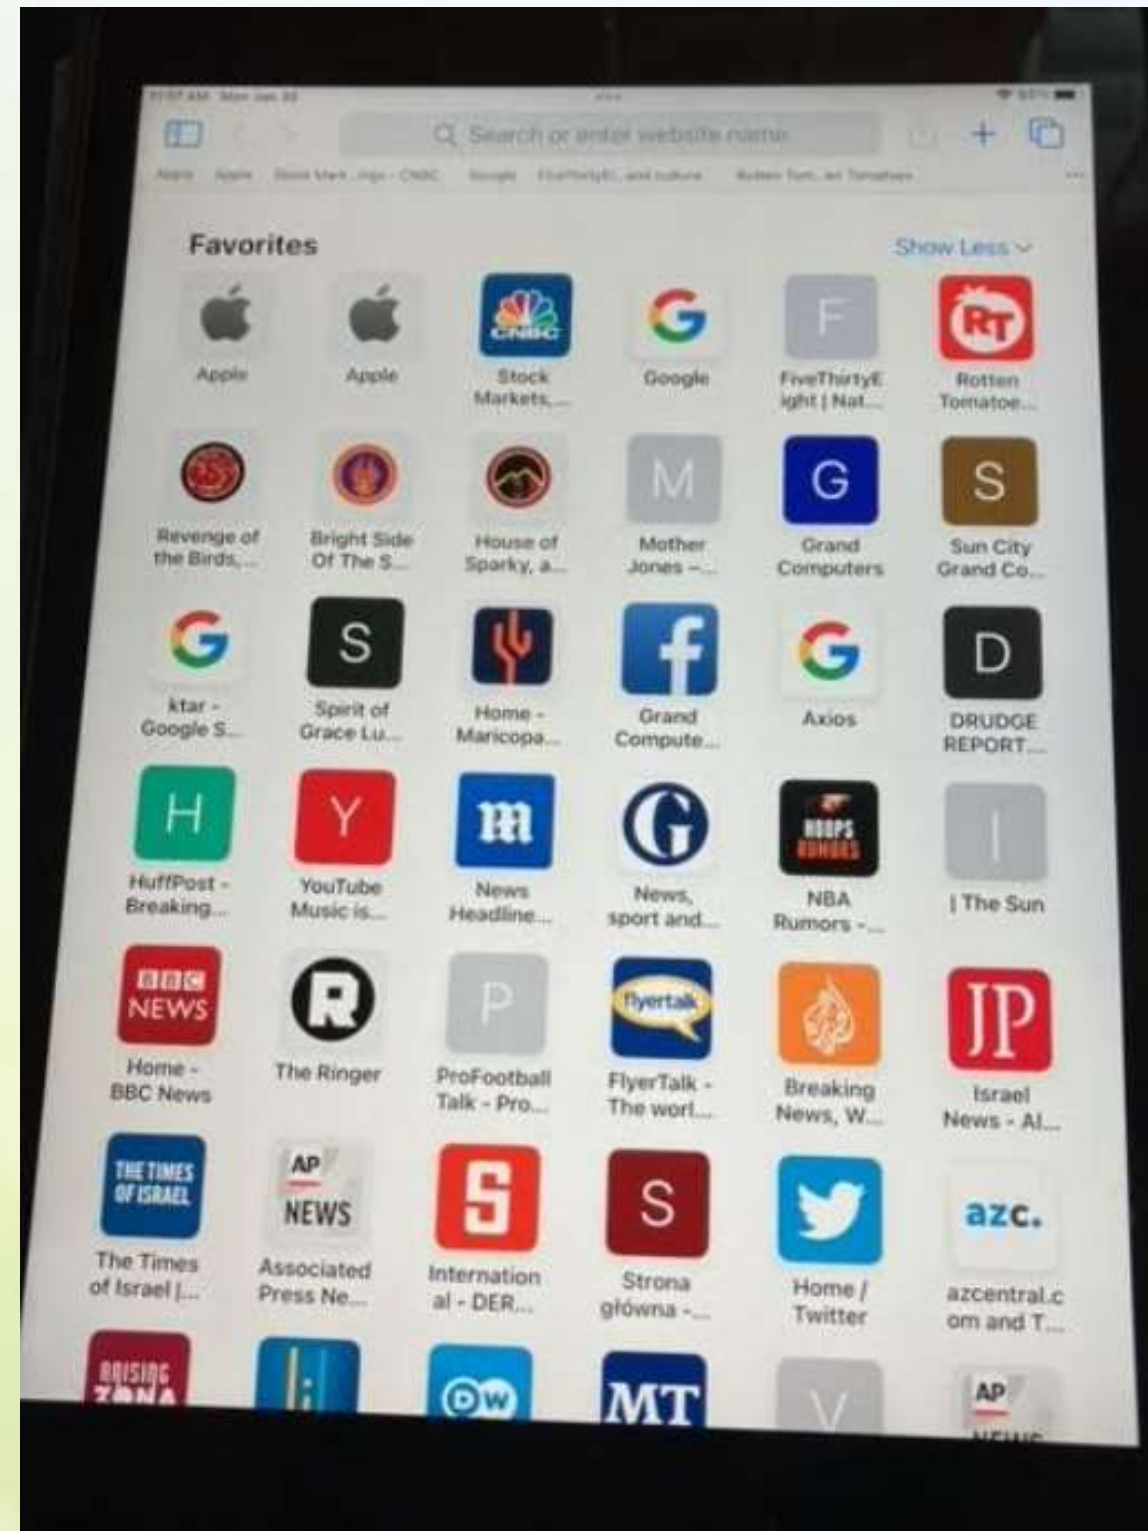

Favorites is a pre-made category under bookmarks. You can call it a special type of bookmarks folder bestowed with certain privileges.

## **SPECIALTY OF FAVORITES**

The thing that makes links under the favorites category special is that they are available on the home screen of Safari. That is, links under favourites show up as shortcuts when you open a new tab in Safari browser. Thanks to that, you can access certain sites quickly with just a tap or two.

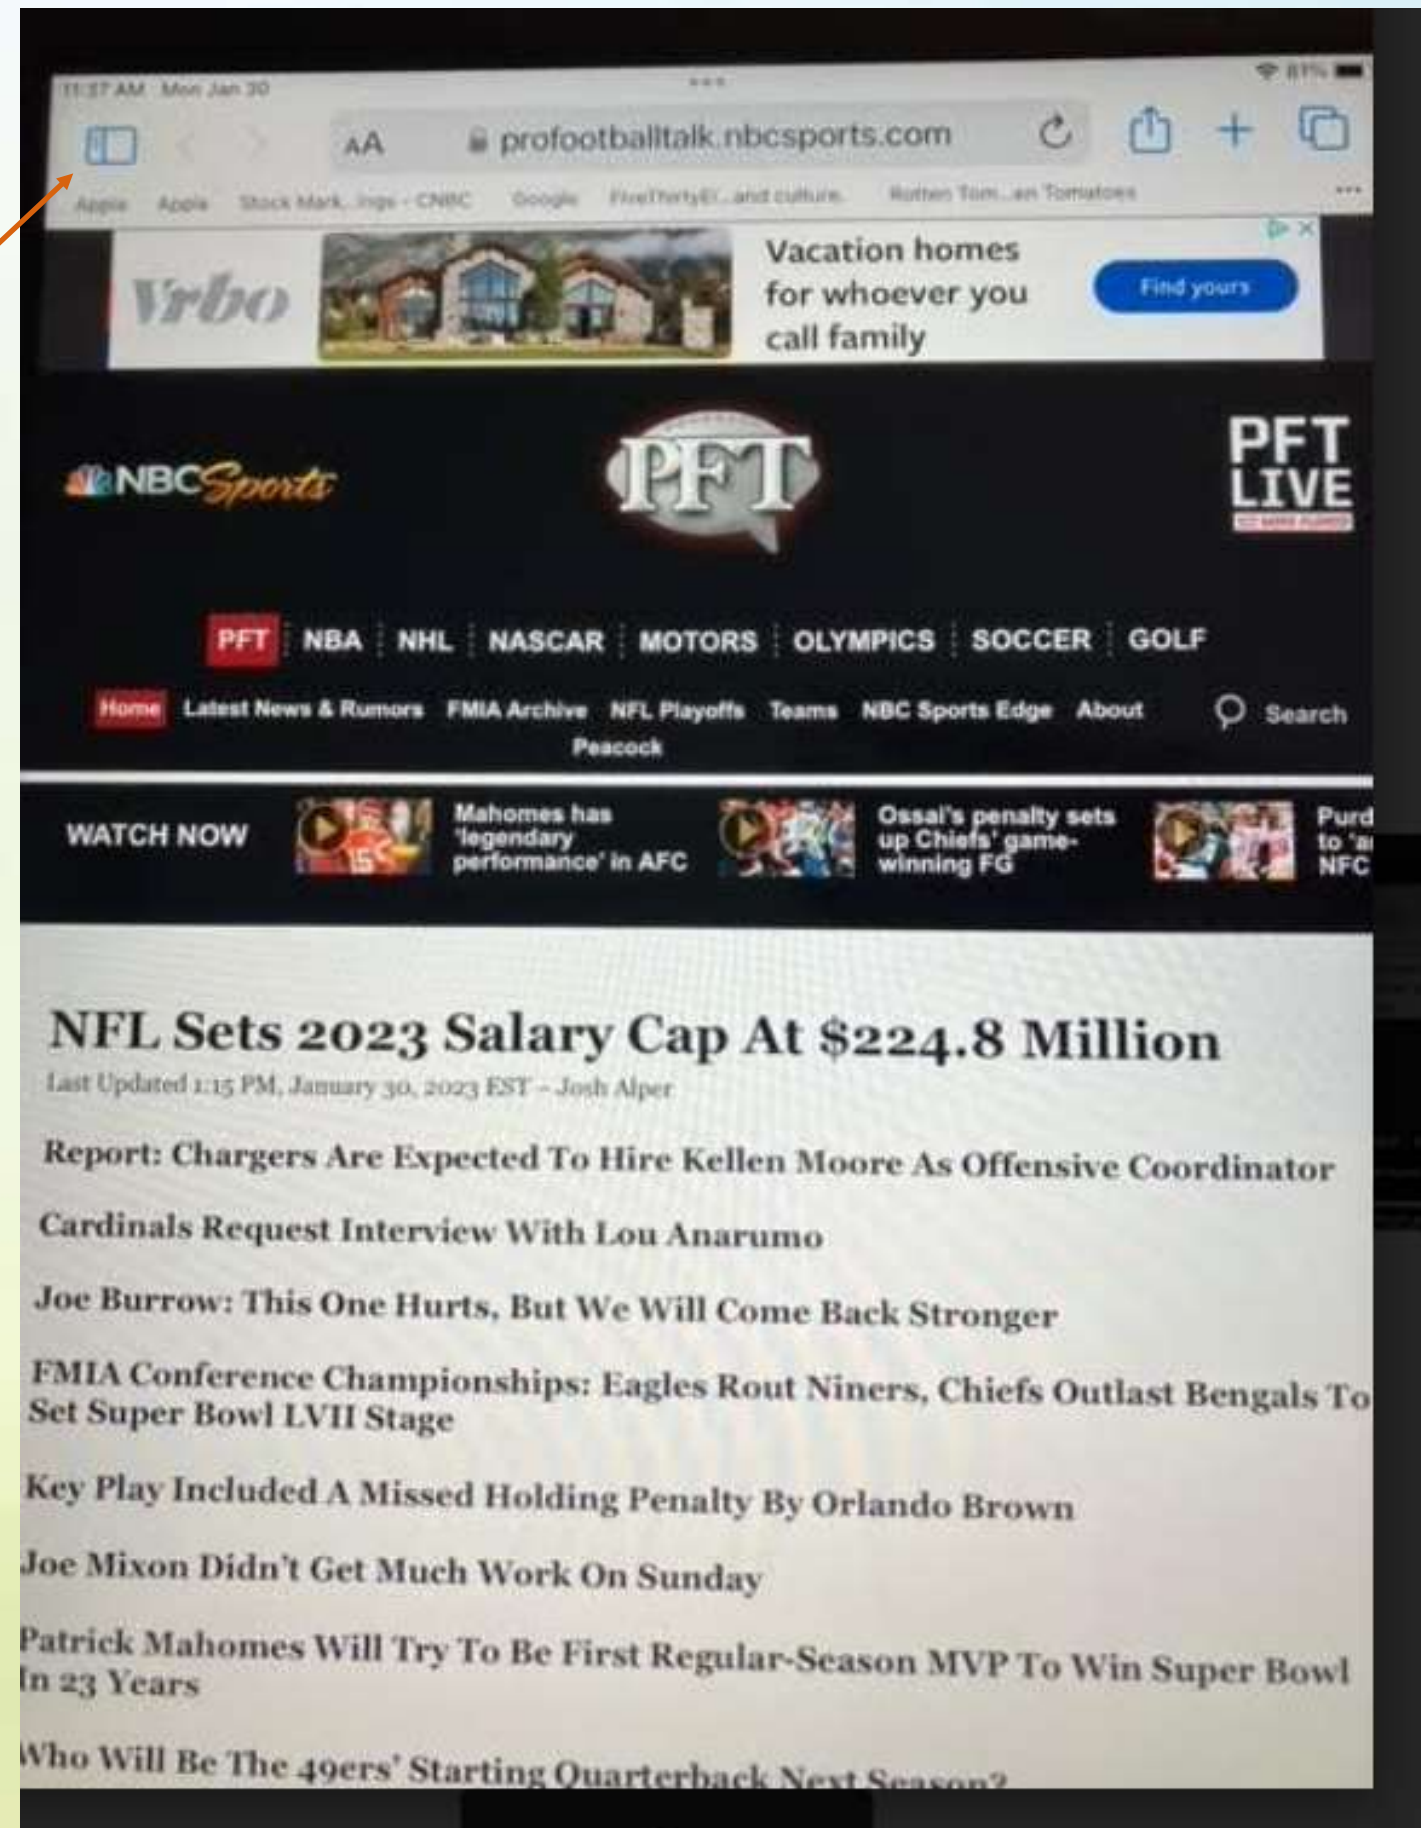

# Here is my iPad opened to Safari

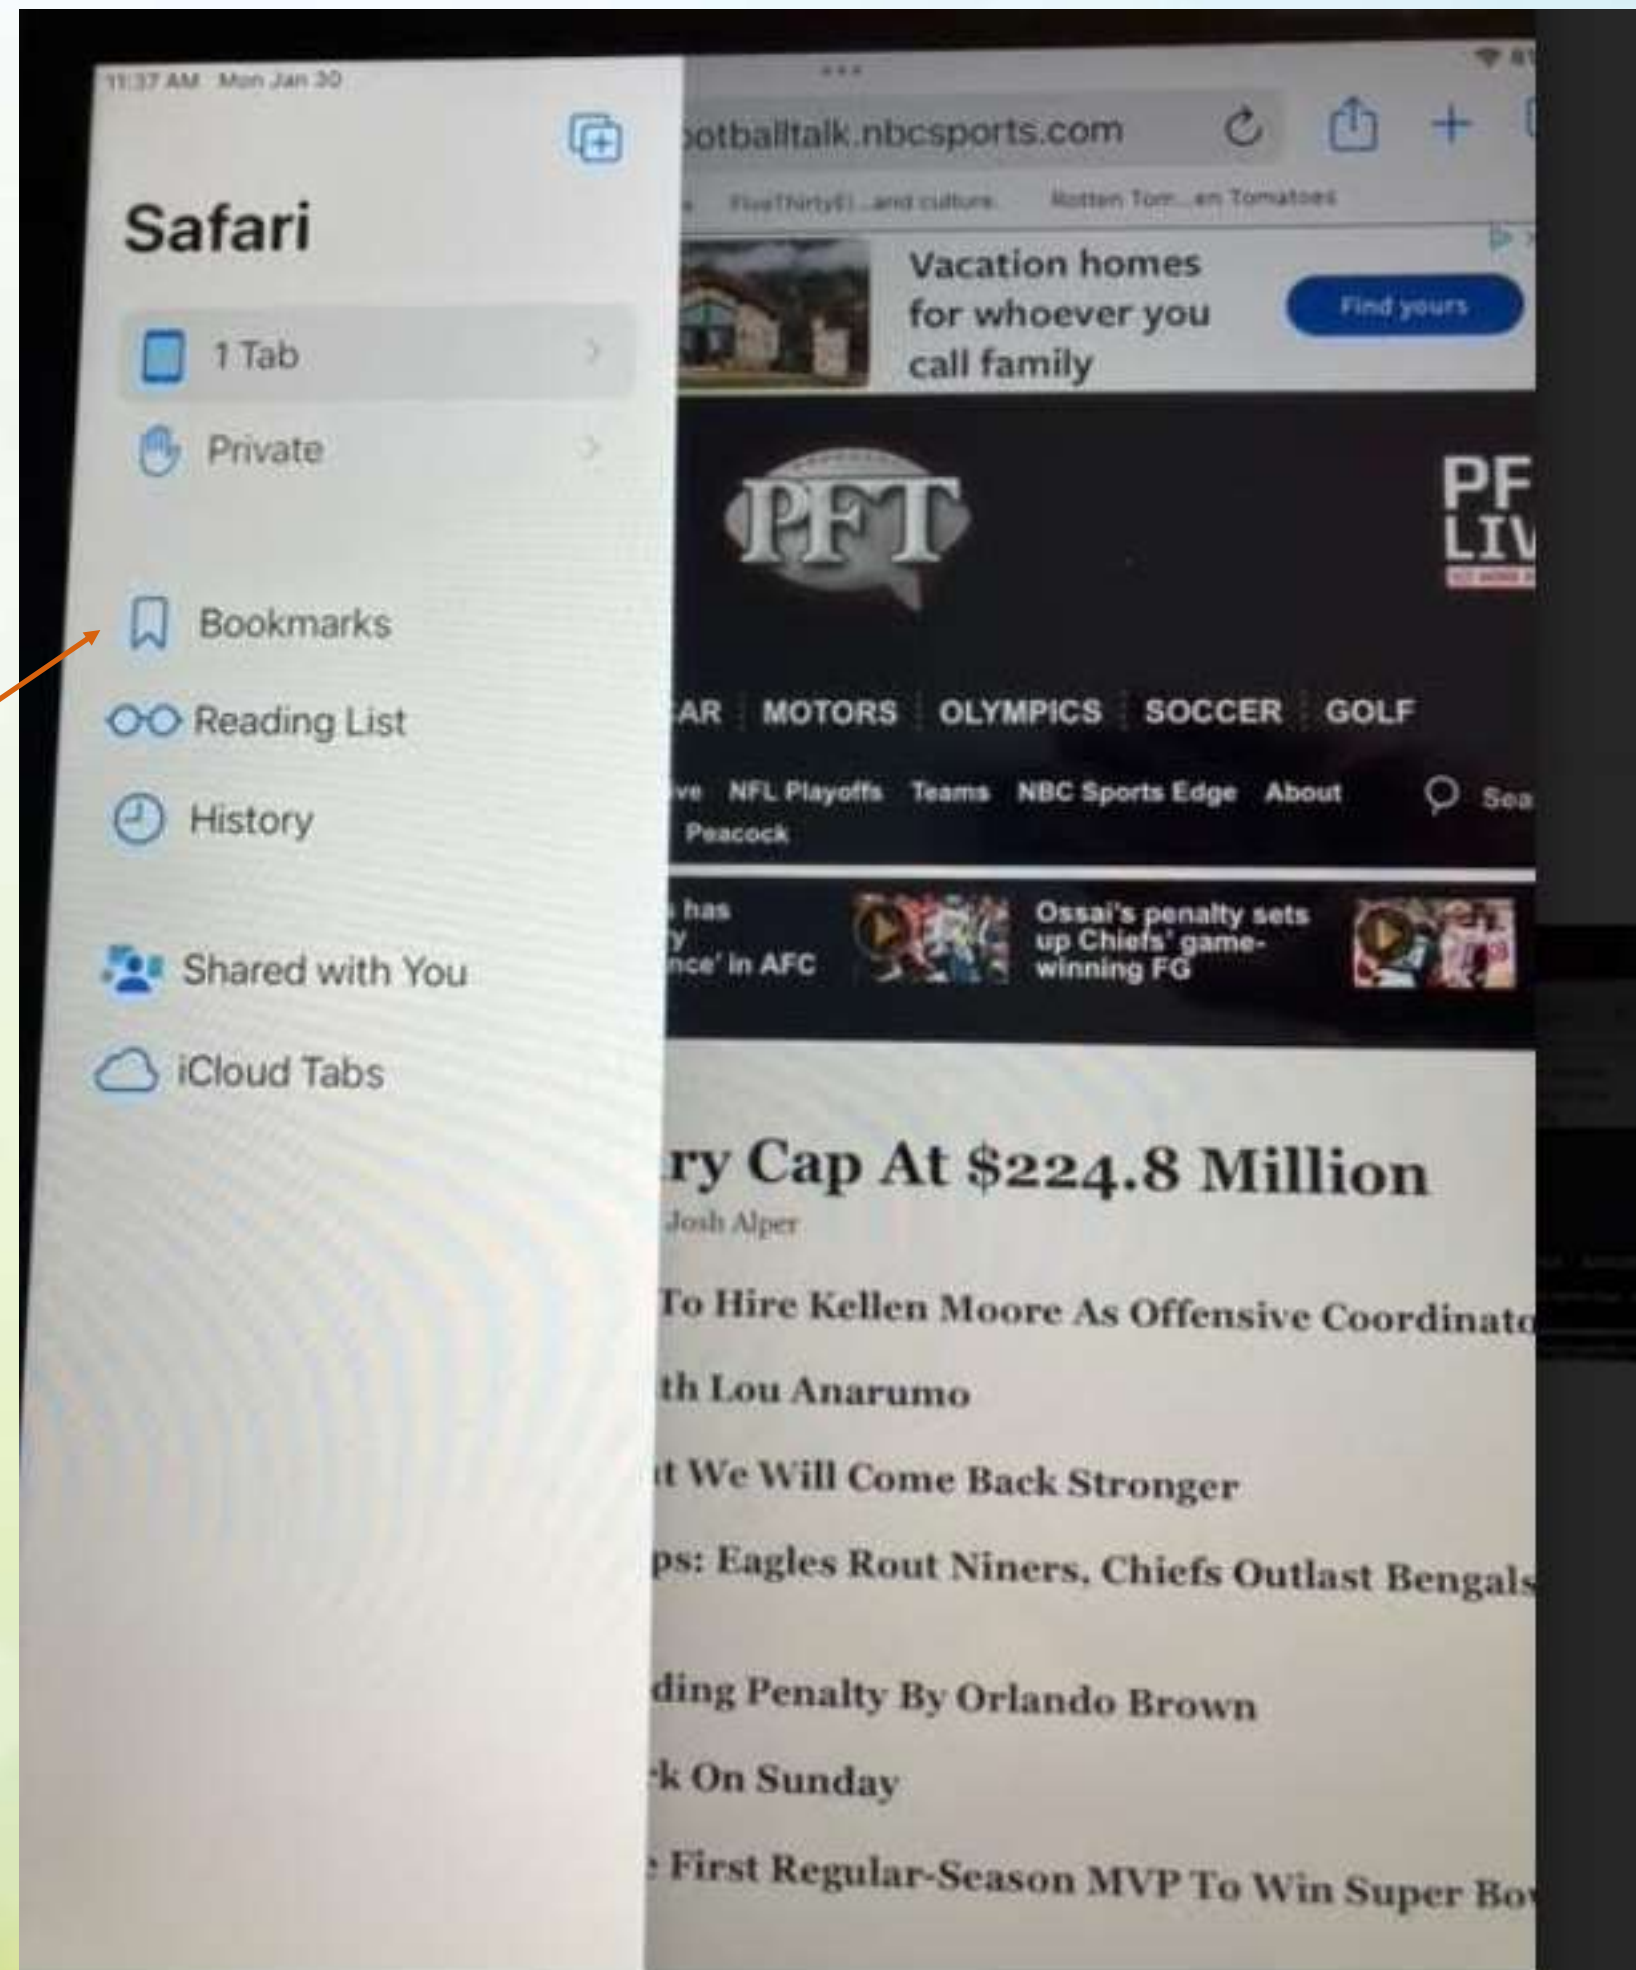

These are all my Favorites

To find Book  
marks, first click  
here

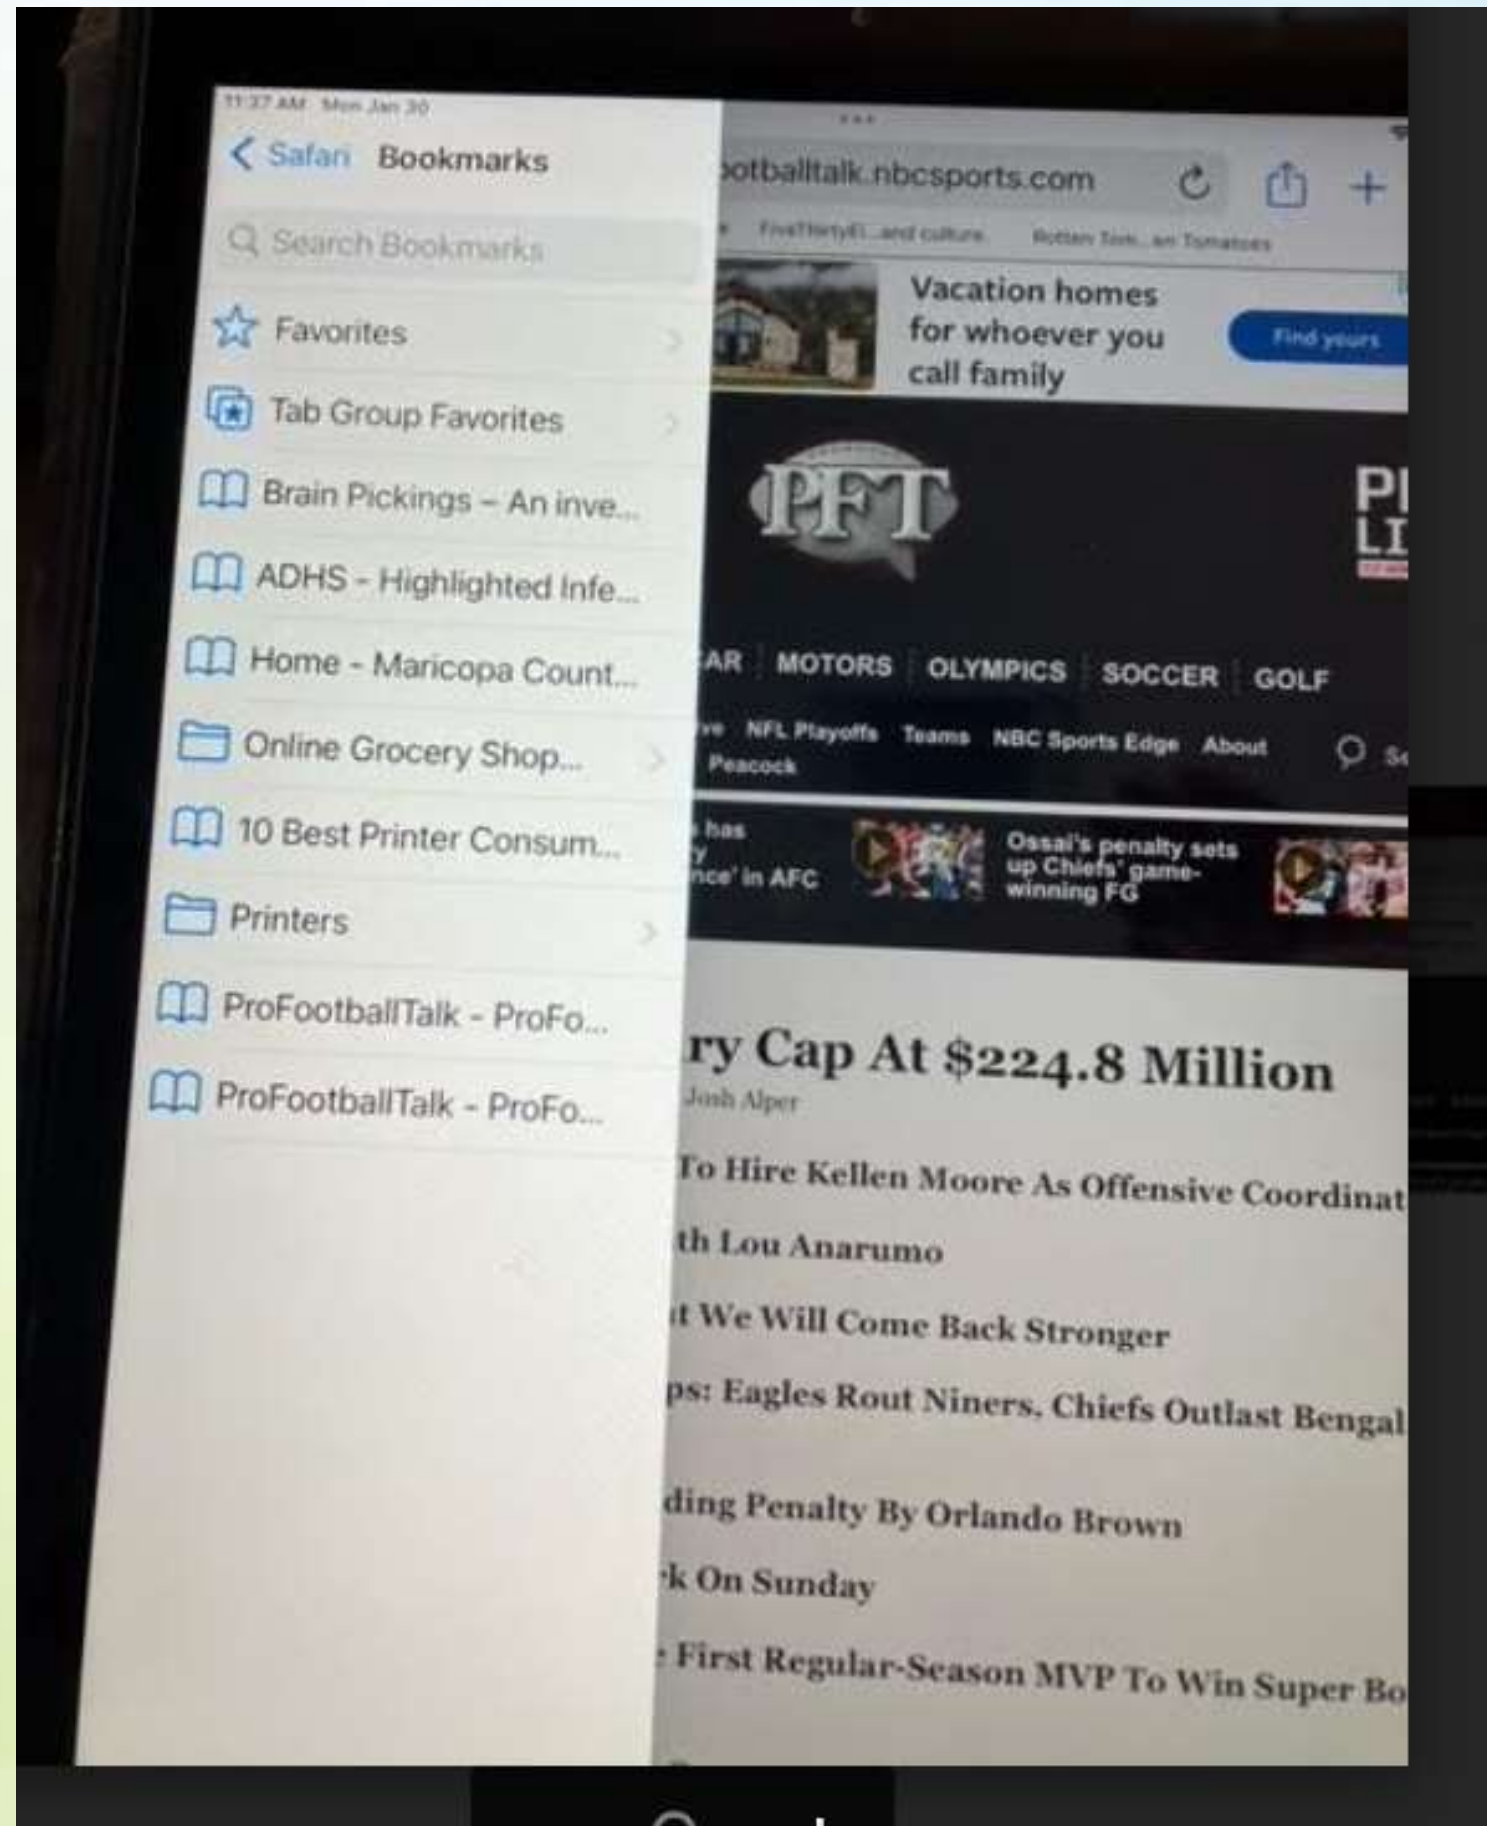

Several choices are shown – Select Bookmarks

Here are my  
Bookmarks

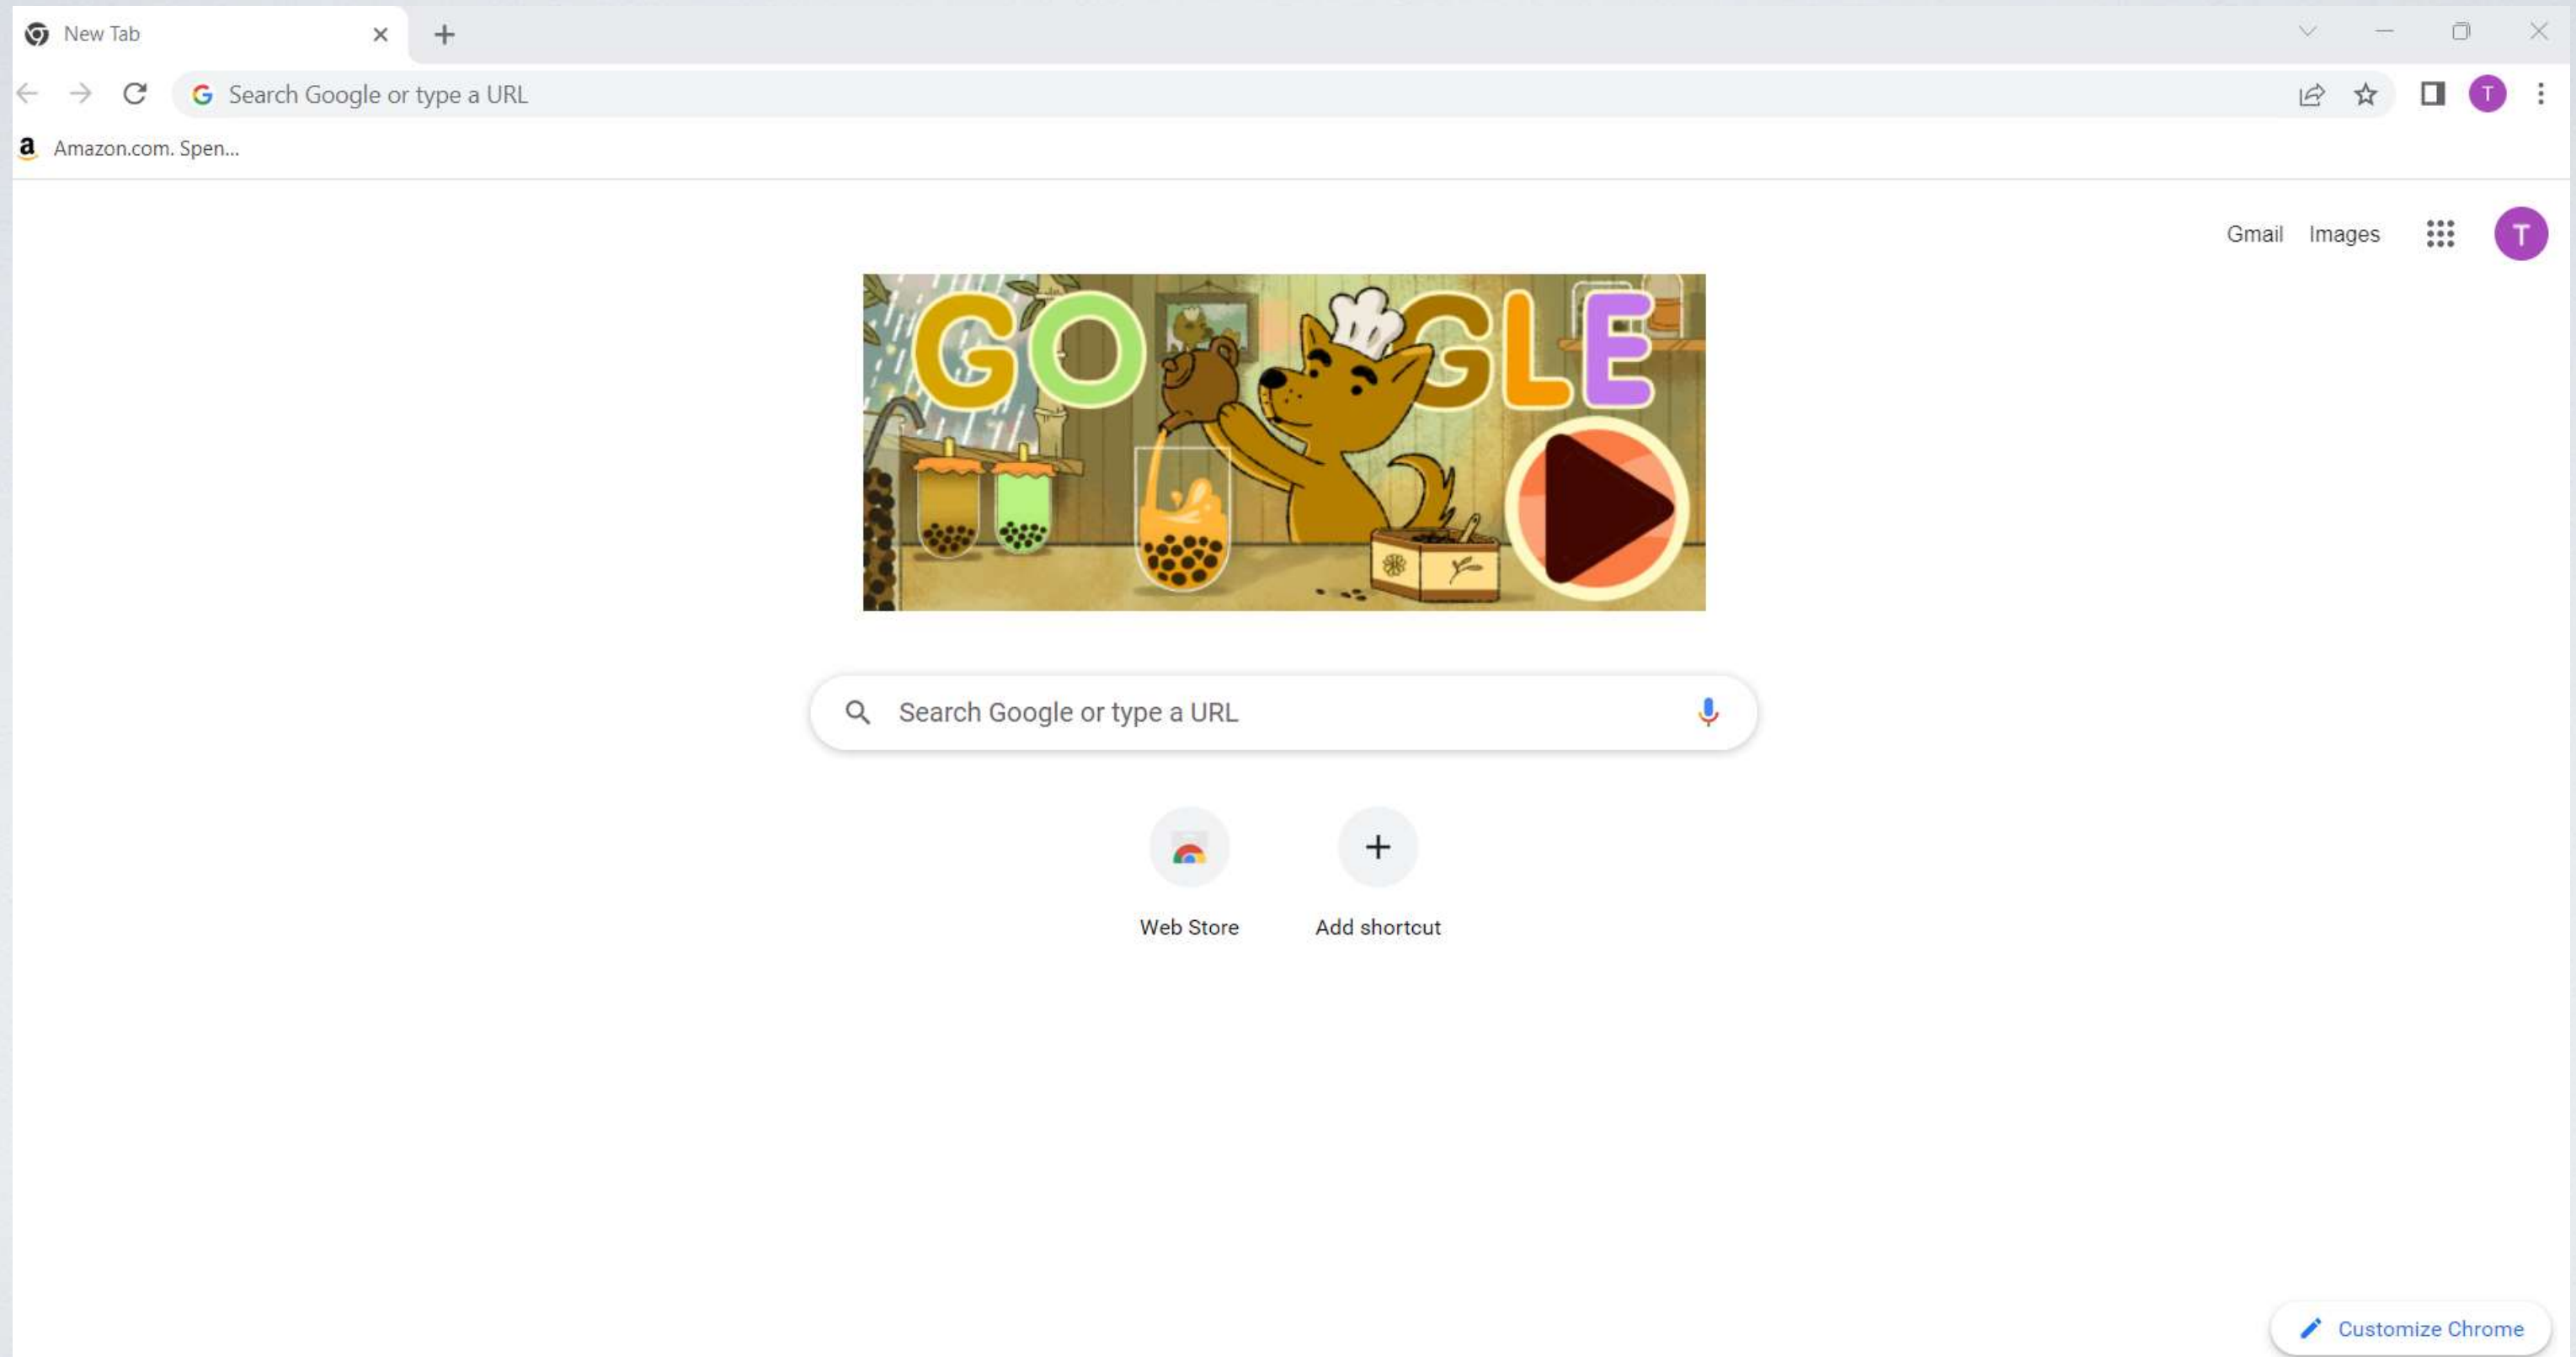

**There is another handy technique  
called Tabs**

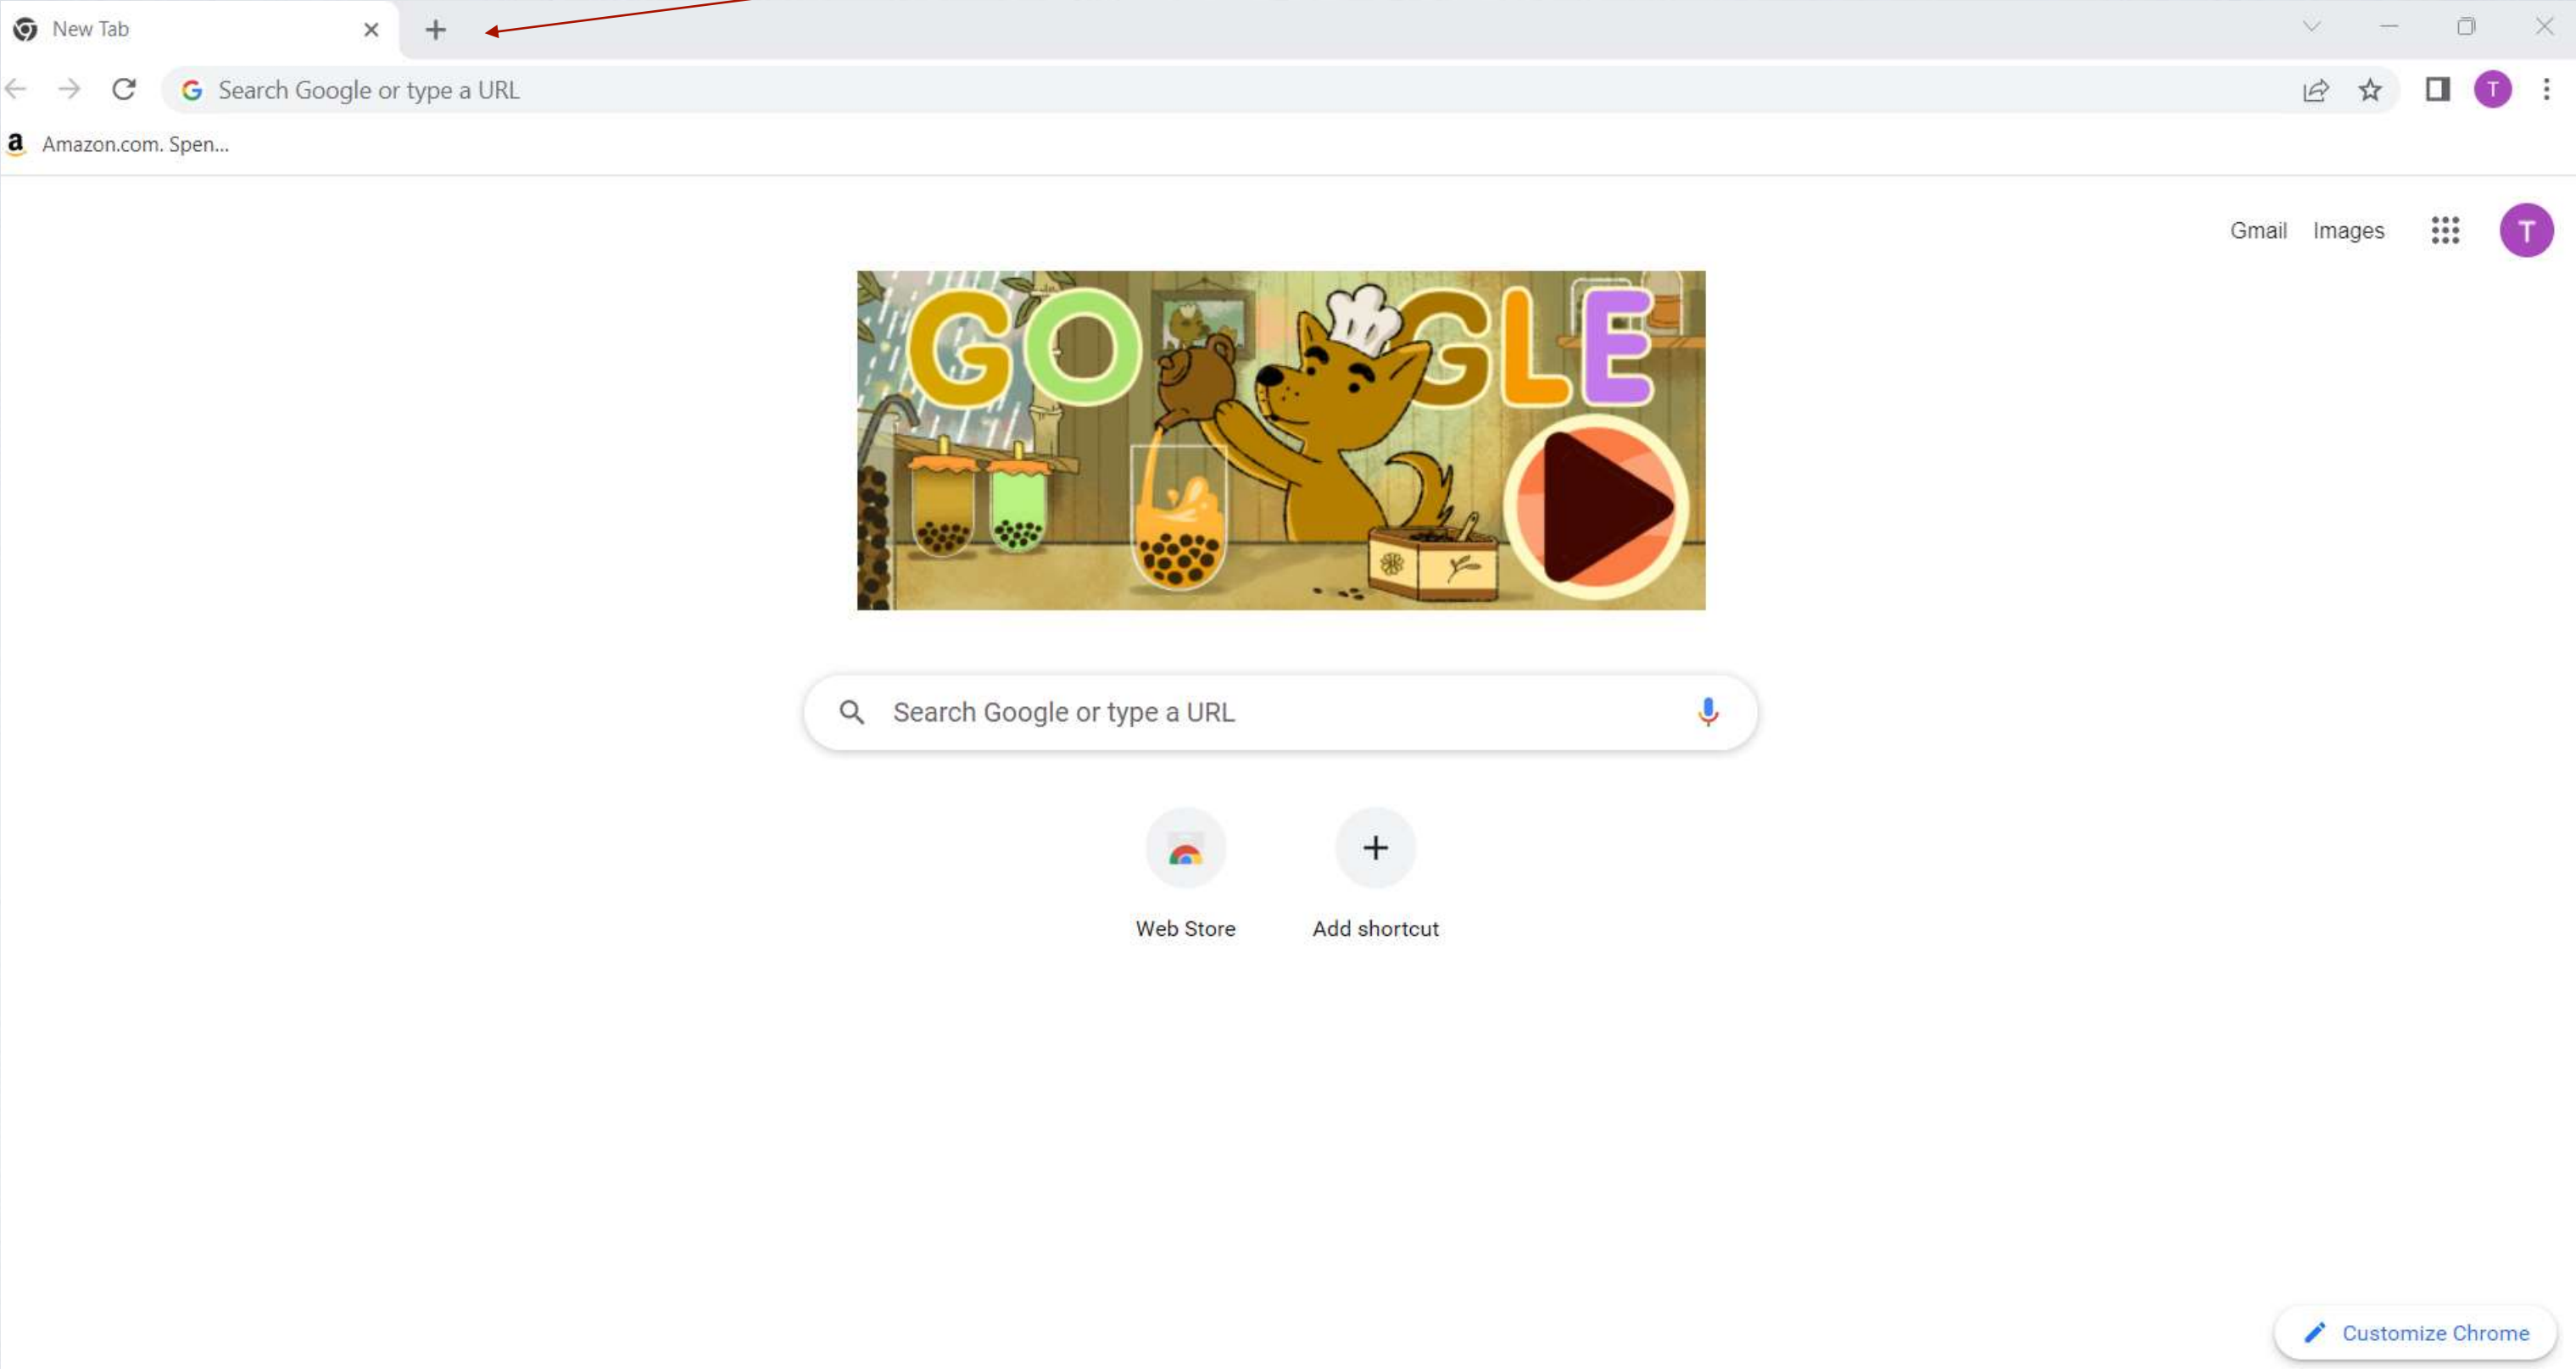

**This can be helpful when you are  
working with more than one  
website at a time**

# We start by accessing Google

Click on the +

# Now I have a second Tab

The screenshot shows a Chrome browser window with two tabs. The first tab is 'New Tab' and the second tab is 'another site - Google Search', which is the active tab. The address bar shows the URL: [google.com/search?q=another+site&rlz=1C1CHBF\\_enUS910US910&oq=another+site&aqs=chrome..69i57j0i512l9.5634j0j15&sourceid=chrome&ie=UTF-8](https://google.com/search?q=another+site&rlz=1C1CHBF_enUS910US910&oq=another+site&aqs=chrome..69i57j0i512l9.5634j0j15&sourceid=chrome&ie=UTF-8). The search bar contains the text 'another site'. Below the search bar, there are buttons for 'Images', 'News', 'Videos', 'Shopping', 'Maps', 'Books', 'Flights', and 'Finance'. The search results show 'About 11,100,000,000 results (0.40 seconds)'. The first result is from <https://anotherwebsite.com> with the title 'AnotherWebsite™' and the description 'Websites that are built on modern technology and look amazing on any screen. We're ready to create the **website** you've always wanted.' The second result is from <https://www.crunchbase.com/organization/another-site> with the title 'Another Site - Crunchbase Company Profile & Funding' and the description 'Another Site is a web design agency that specializes in the design & constructions of all types of websites with content management systems.' The third result is from <https://theuselessweb.com> with the title 'The Useless Web' and the description 'TAKE ME. TO A. USELESS. **WEBSITE**. → PLEASE ←. Discover about the **Sites**. The Useless Web... because some websites, we just couldn't do without.' At the bottom, there is a section 'People also ask' with the question 'What are the four types of sites?' and a dropdown arrow.

# **What are Pop-Ups ?**

**A popup is a window that appears (“pops up”) while browsing a website.**

# Pop-Ups are frequently used to offer a discount

Here's a typical popup used for marketing purposes.

## Pop-Ups can be blocked

People also ask :

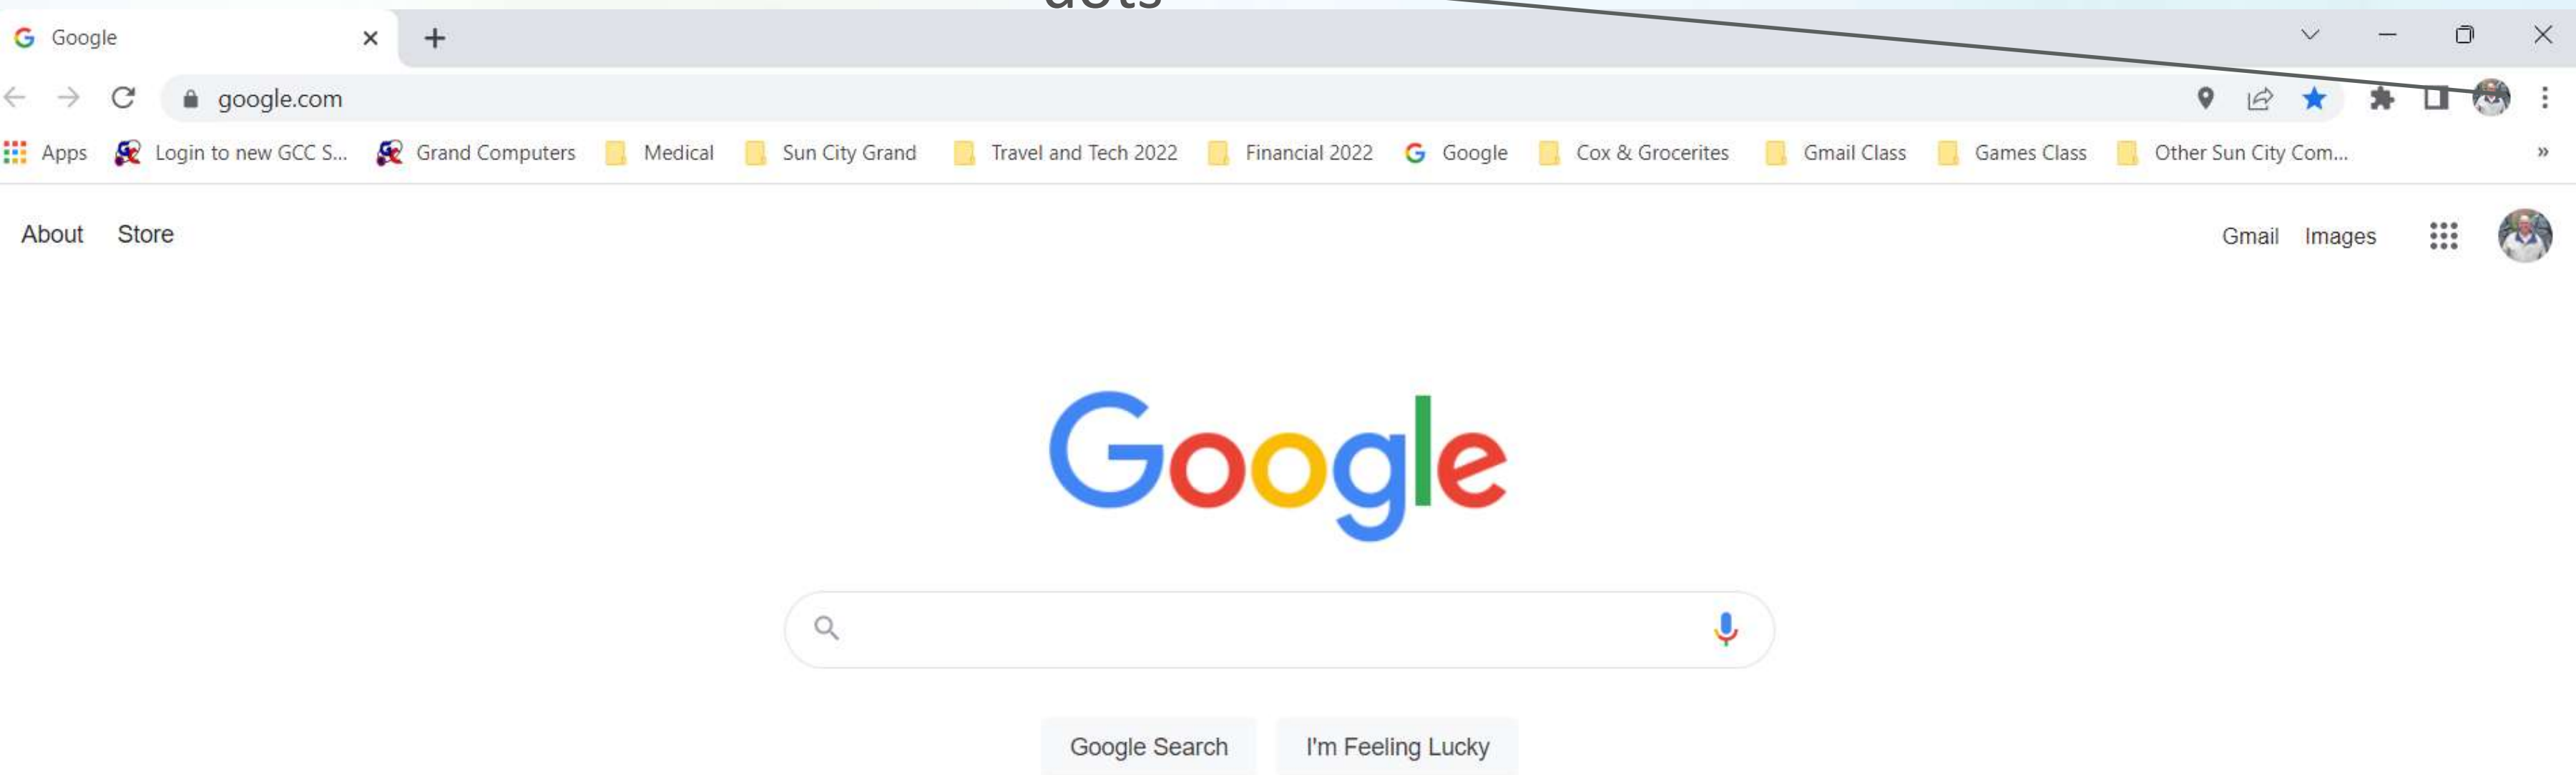

---

Why would you block pop-ups?

Pop-up blockers are built into common web browsers **to prevent unwanted pop-up windows from interfering with and cluttering your browsing experience.** Most pop-ups are ads, malware, and other unwanted windows. Aug 7, 2020

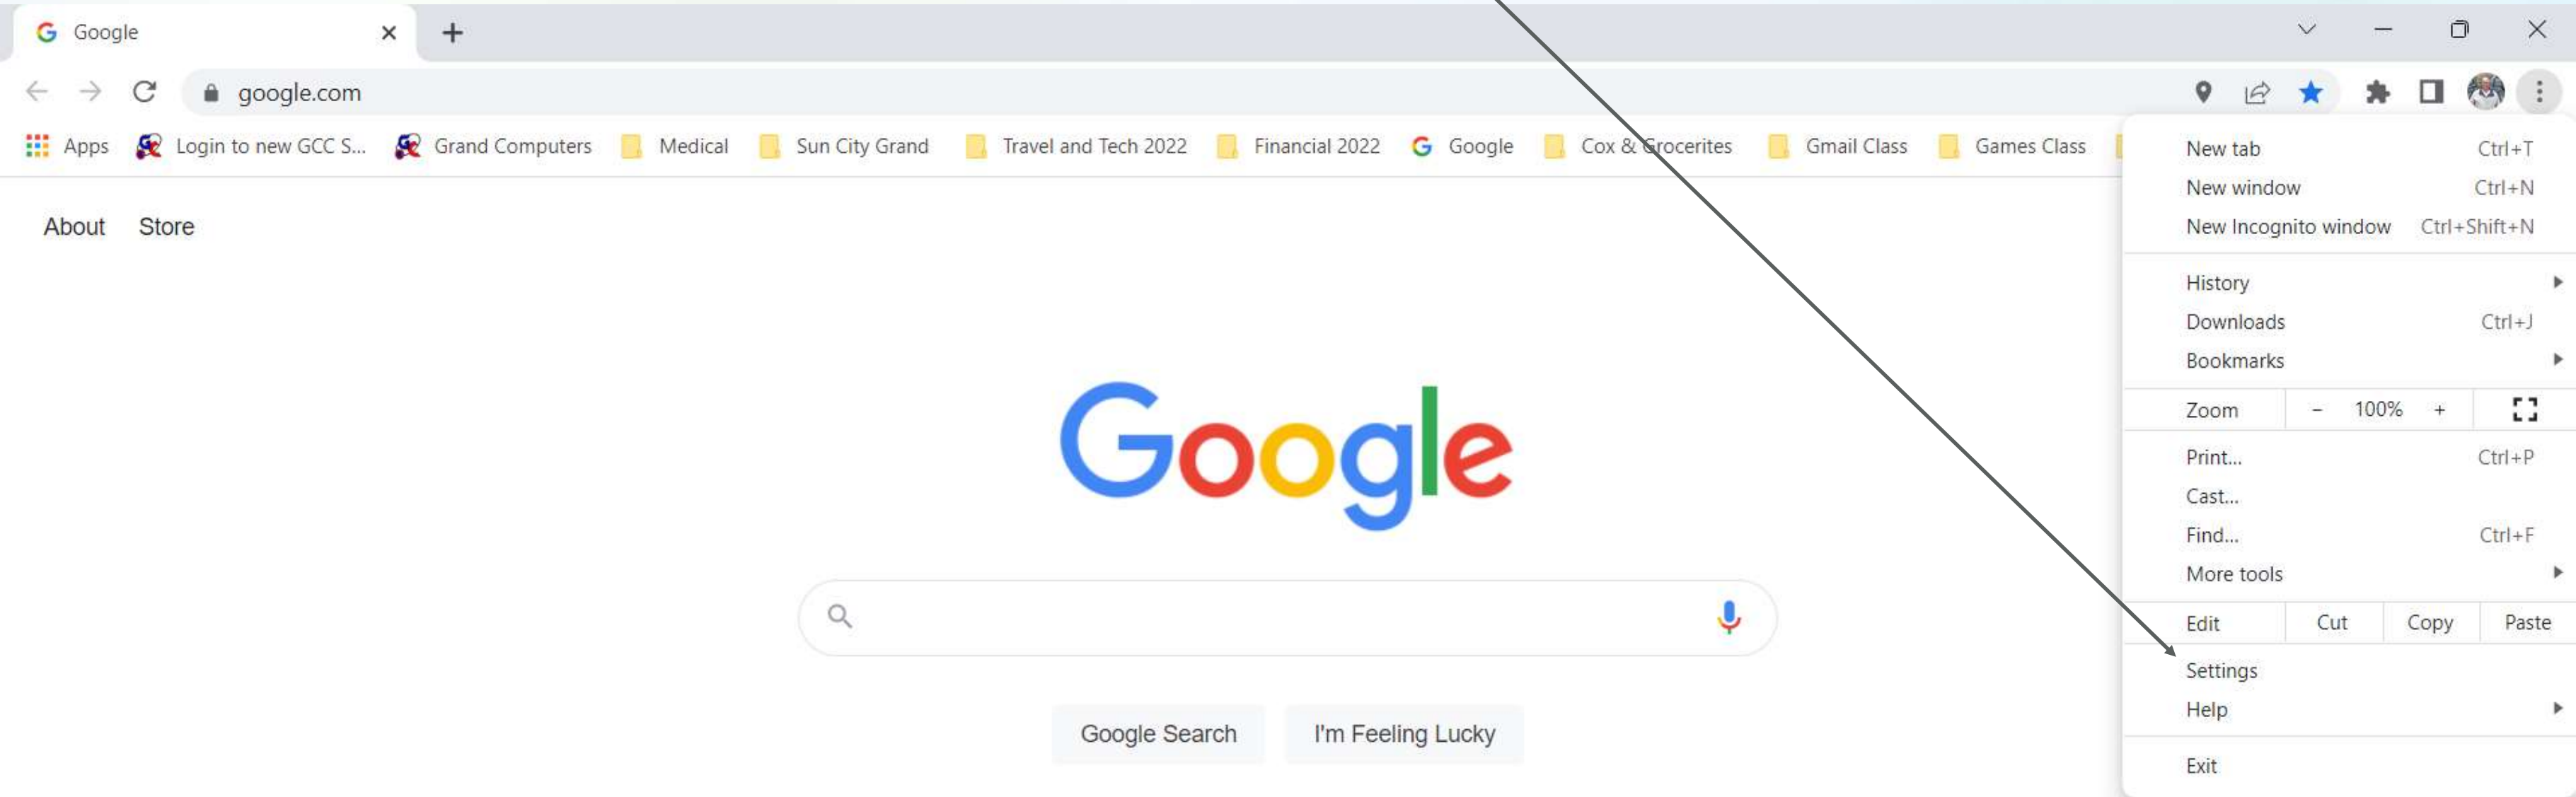

**In Google Chrome, you can choose  
whether to allow or block Pop-Ups**

Open Chrome Browser and click on the three dots

# Go to Settings

# Click on Privacy and Security

The image shows a Chrome browser window with the Settings page open. The address bar shows 'chrome://settings'. Web Browsing V10.0 - PowerPoint

Web Browsing V10.0 - PowerPoint

**What if the words are too small for  
me to read ?**

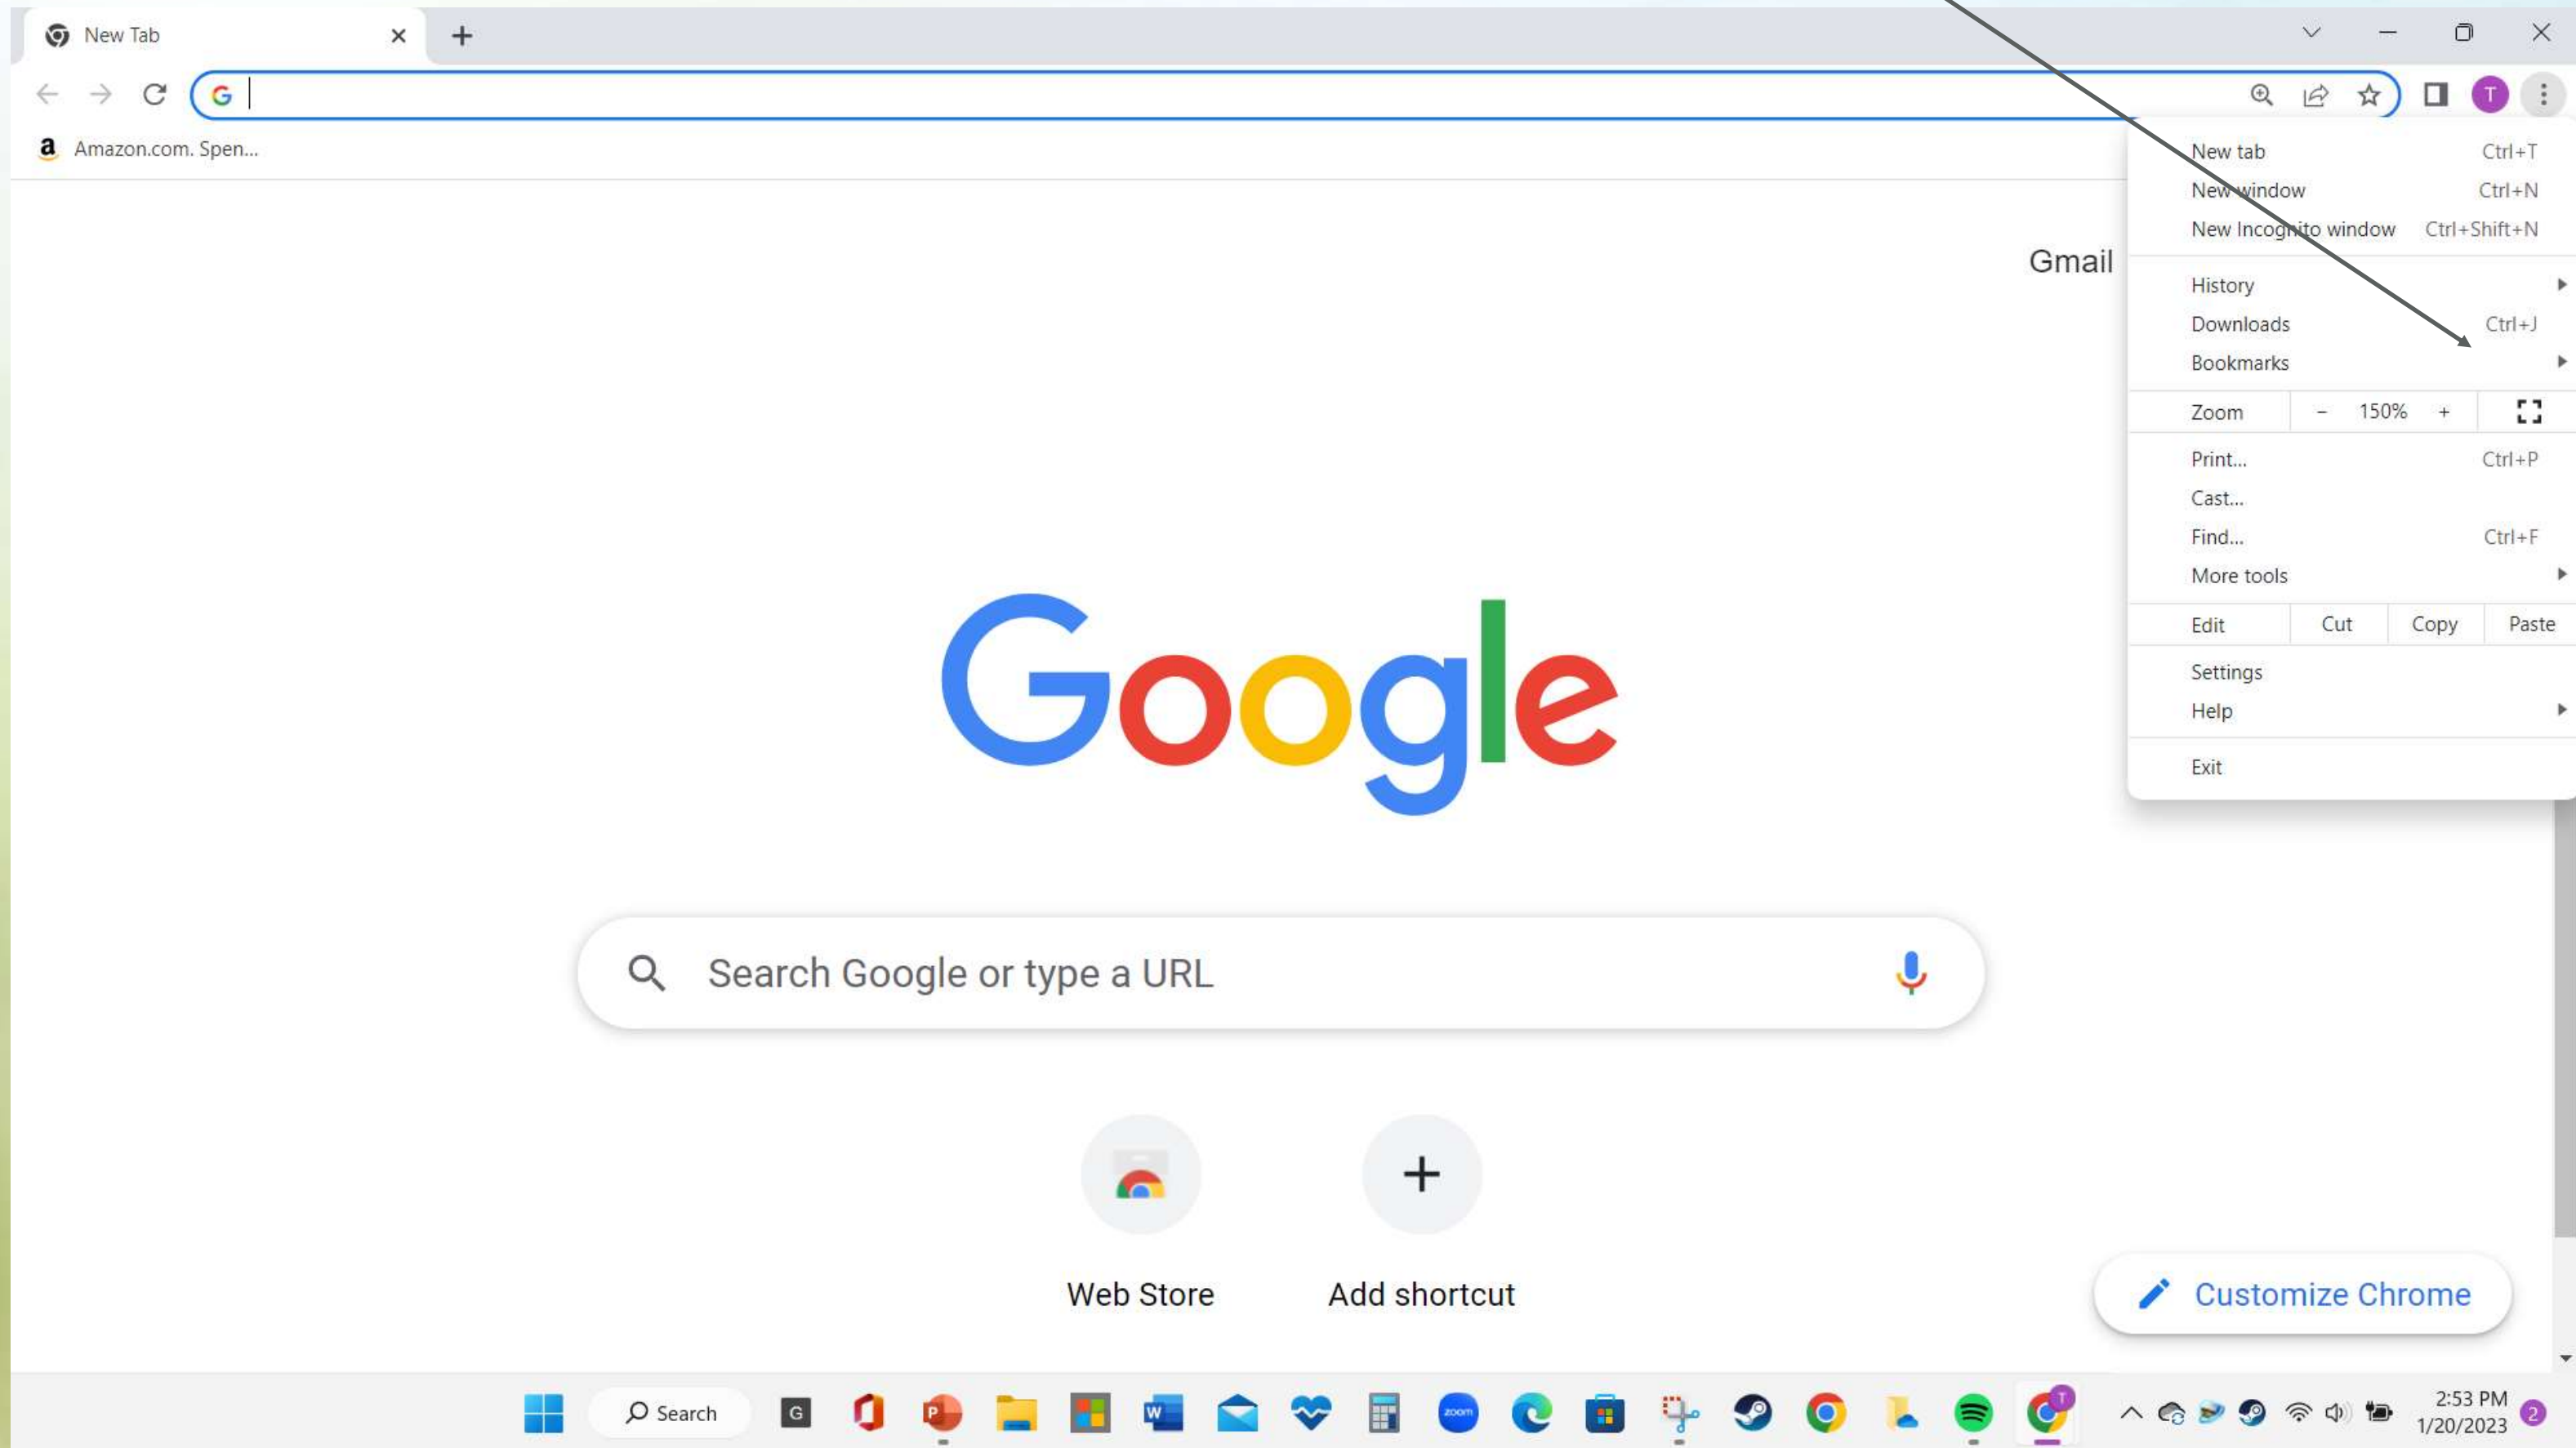

# Click on the three dots

# Click on zoom

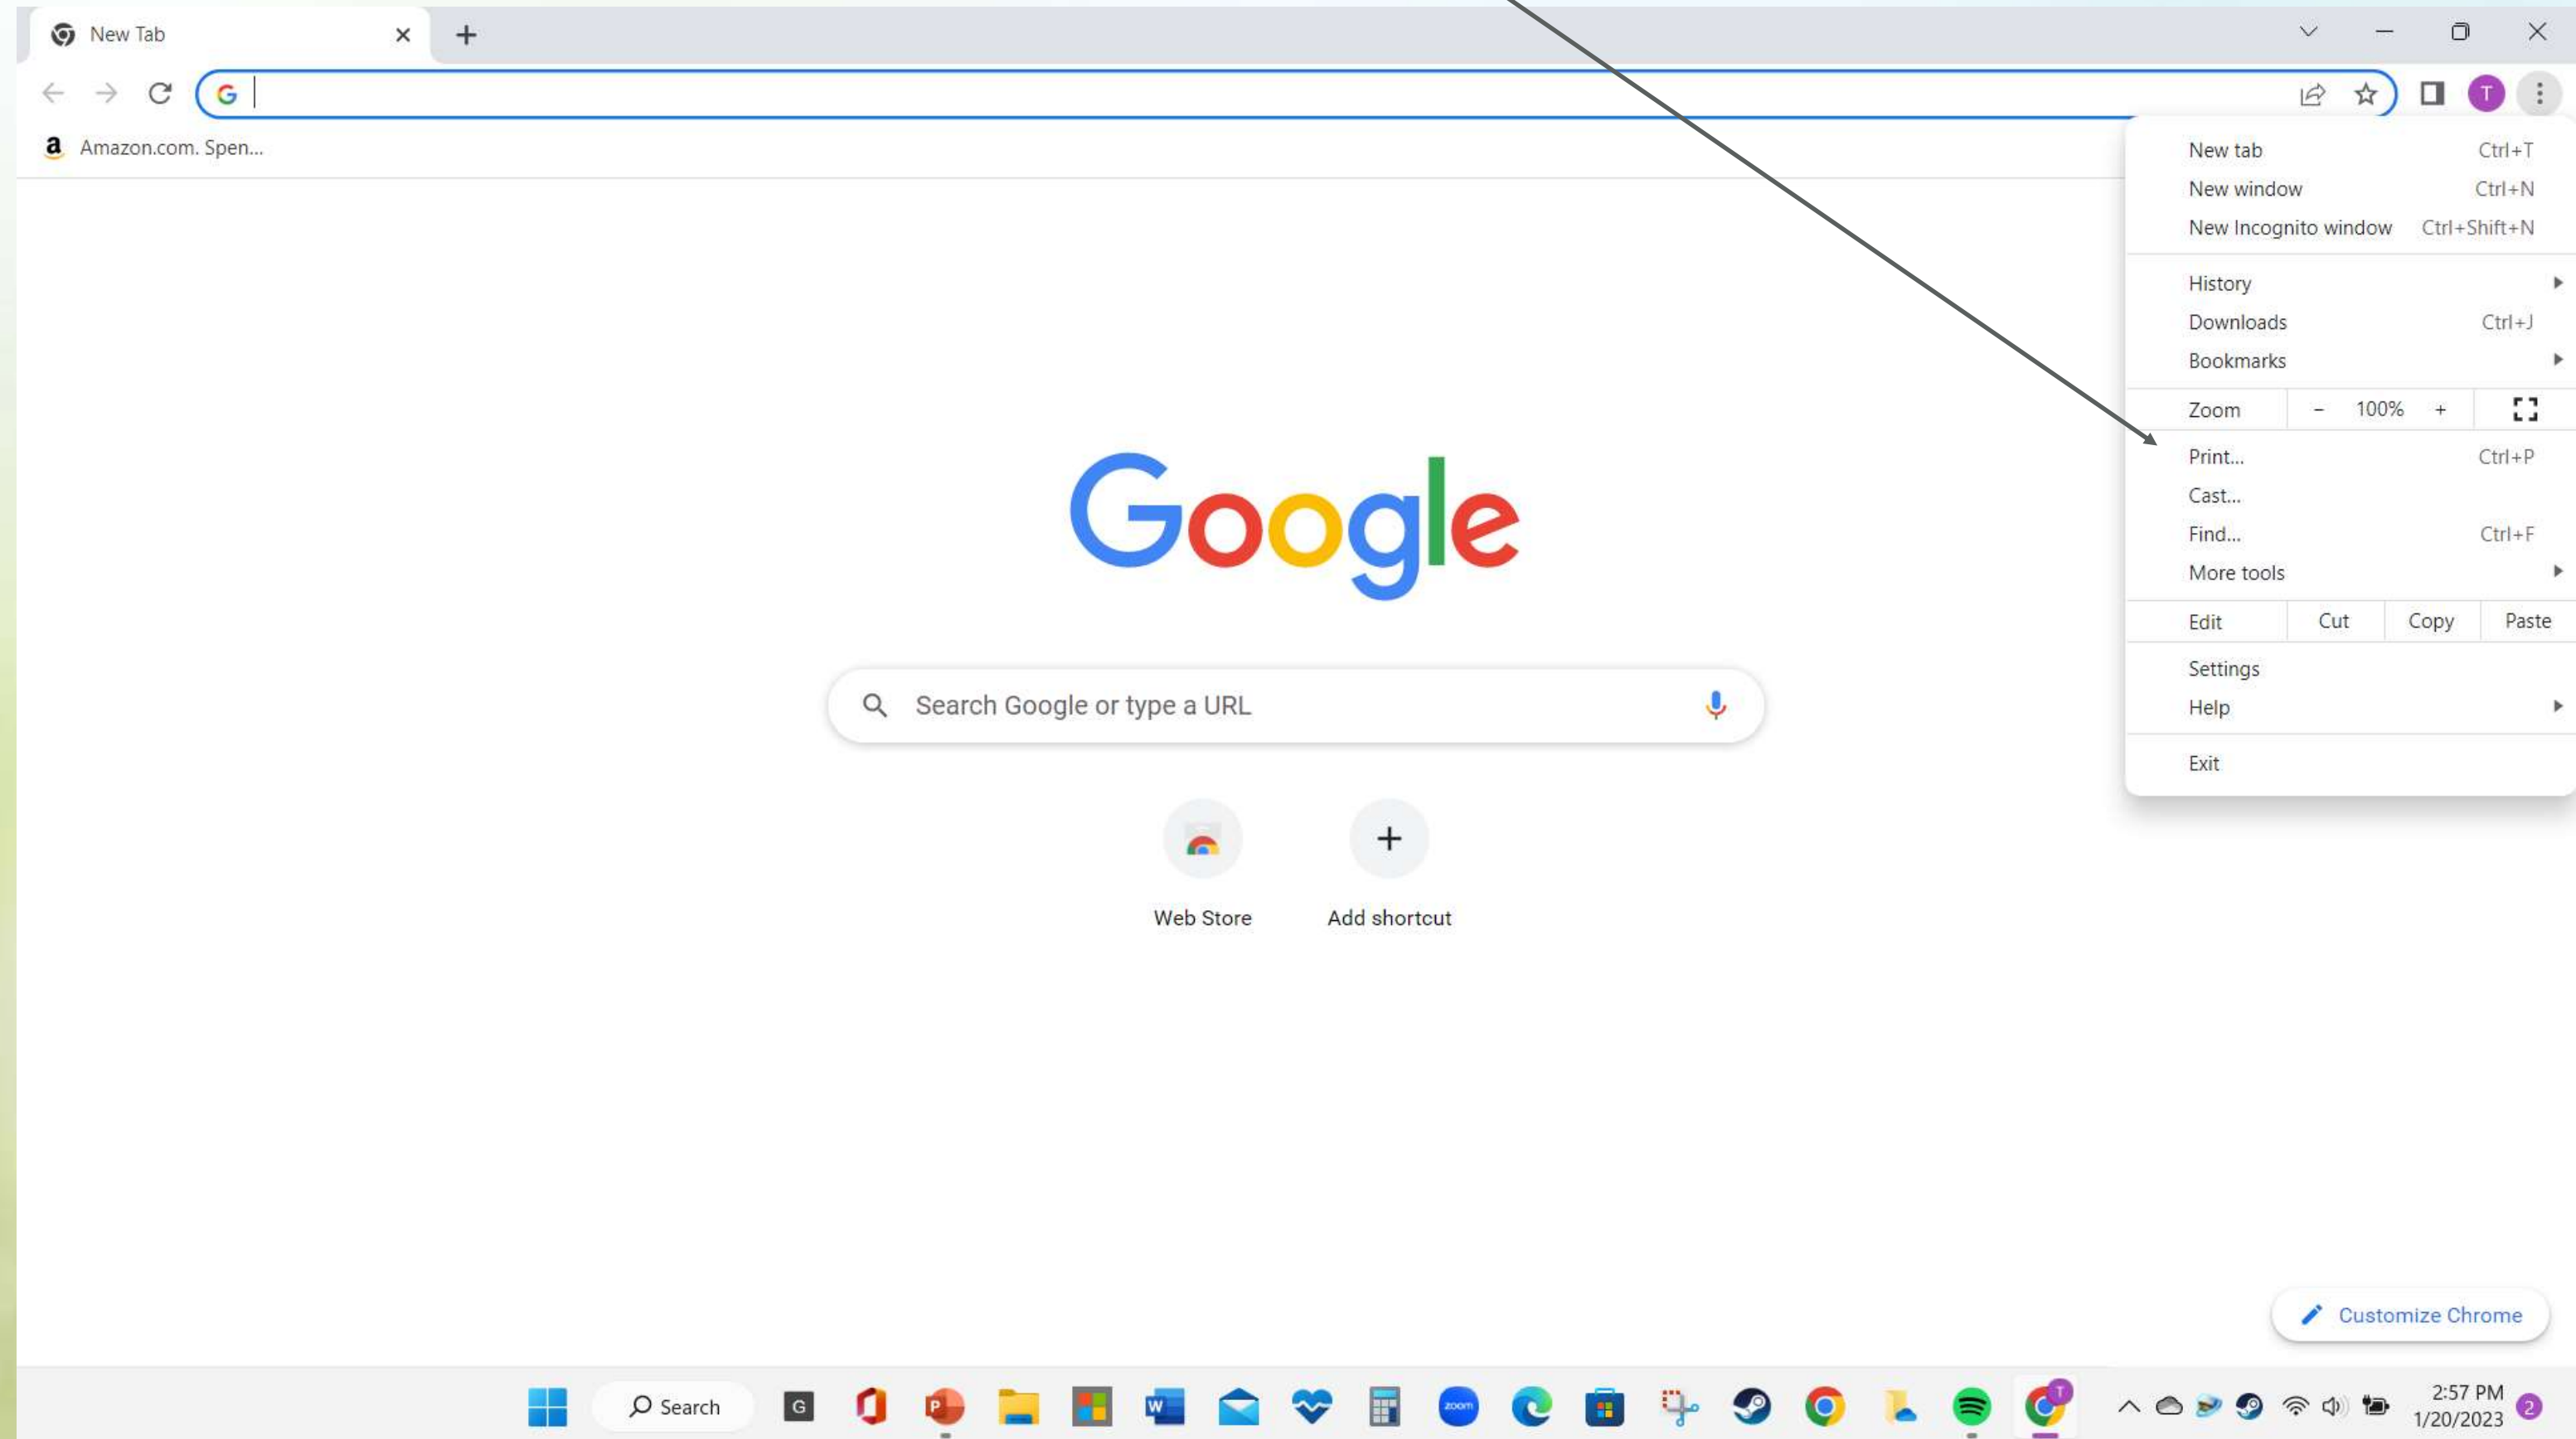

Increasing the zoom, in this case to 150%, makes things Larger

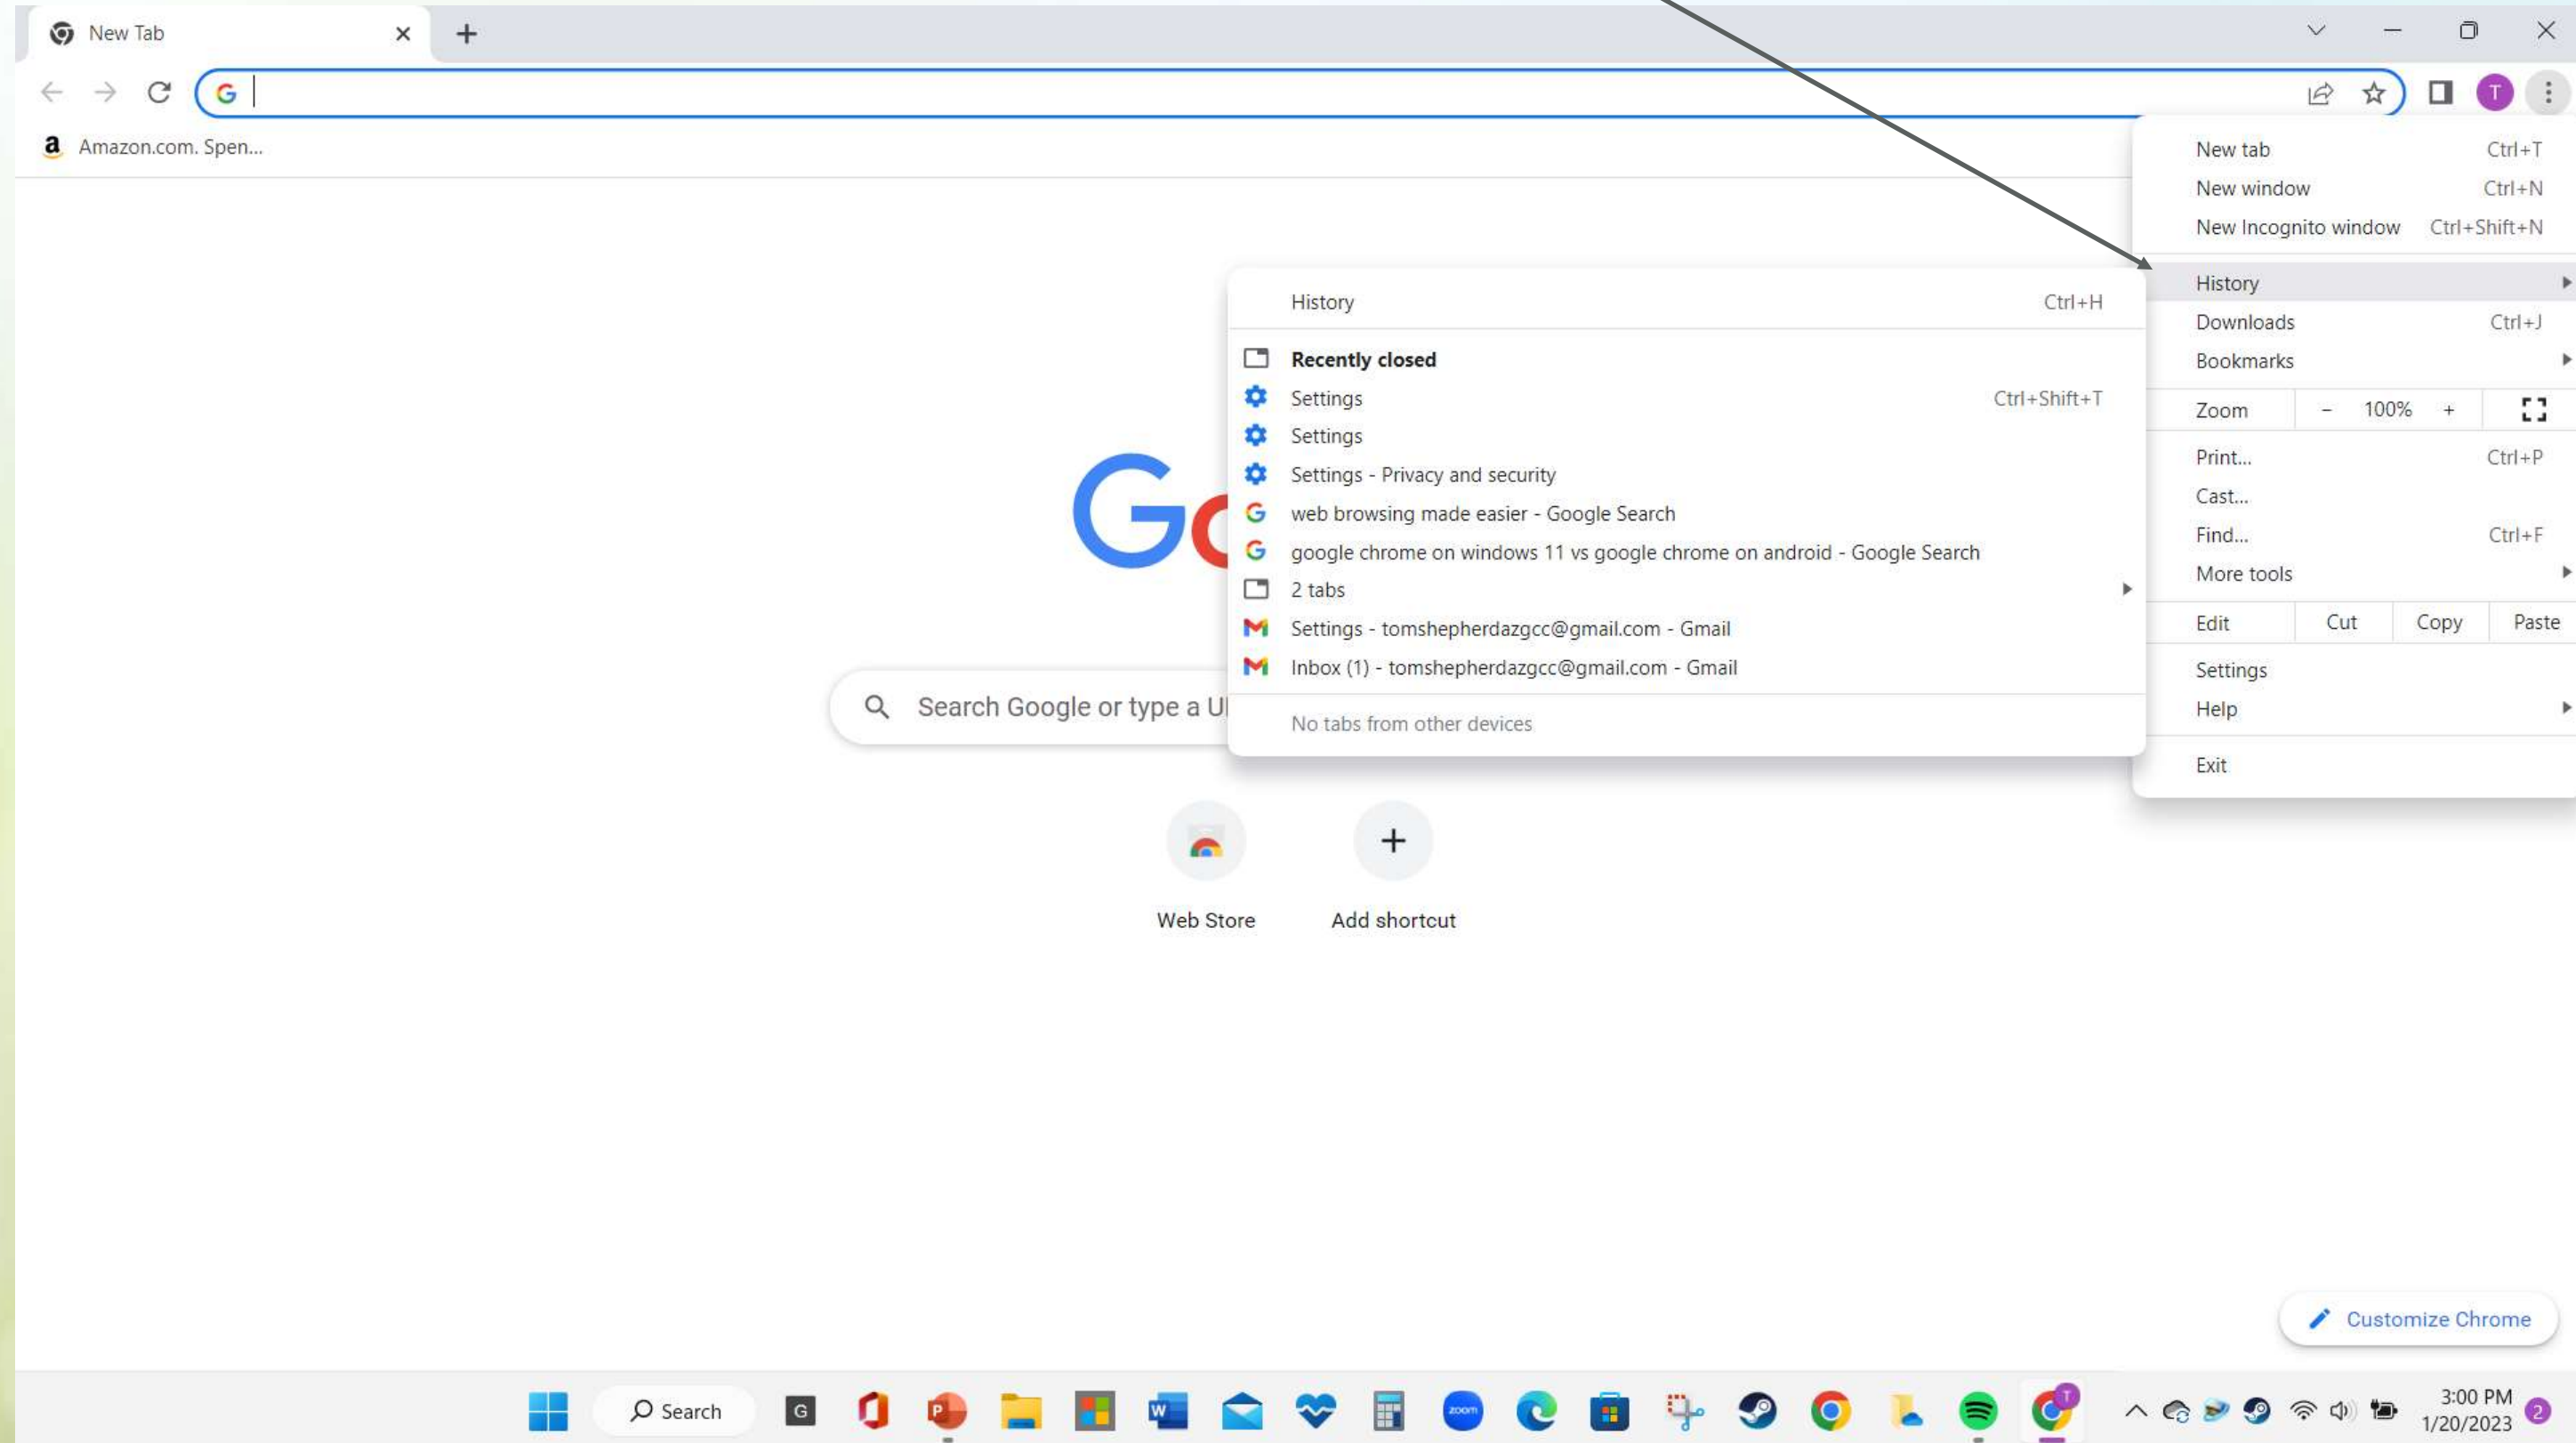

To print, select the three dots and chose print

# If you want to review your recently used web pages, click on History

**Can I have more than one  
browser on my device ?**

**Yes, and there may be times when that  
is helpful**

**Sometimes, for whatever reason, a particular website may not work 100% correctly with a certain browser**

**You can often get around this by simply using a different browser for that same website**

**For example, the default browser on an  
Apple devices is Safari**

**But**

**You can easily download Google  
Chrome from the Apple store, install it  
on your device, and use it instead of  
Safari**

# Get Google Chrome

Download Chrome for [iPhones and iPads](#) .

Chrome is available for:

- iPad, iPhone, and iPod Touch
- iOS 12 and up
- All languages supported by the App Store

This app is available only on the App Store for iPhone and iPad.

## Google Chrome 17+

**Browse faster  
with Google  
Chrome**

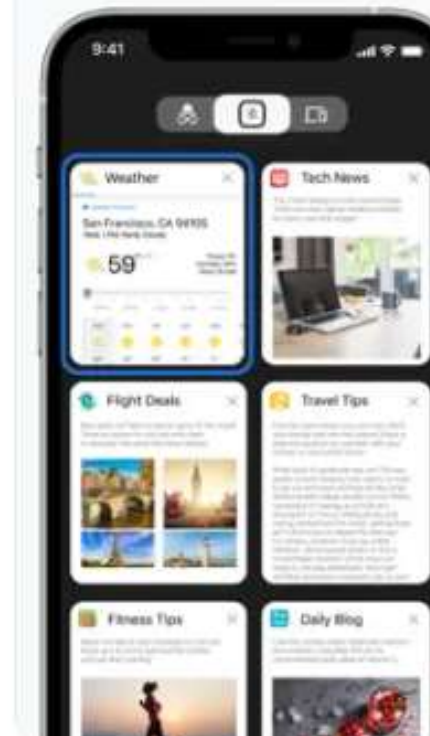

**Autofill  
passwords and  
payment info**

**Translate websites  
instantly**

**Manage your  
tabs with ease**

**Similarly, if you are on Windows and  
having problems with a website on  
Google Chrome**

**Try switching to Edge (it's built in  
anyway)**

**There may be times when a help desk person  
tells you to  
“Clear your cache”**

**What does that mean?**

**When you use a browser, like Chrome, it saves some information from websites in its cache and cookies.**

**Clearing them fixes certain problems, like loading or formatting issues on sites**

All the browsers have a  
function to clear cache

# Chrome on Windows

## In Chrome

1. On your computer, open Chrome.
2. At the top right, click More ⋮.
3. Click **More tools** > **Clear browsing data**.
4. At the top, choose a time range. To delete everything, select **All time**.
5. Next to "Cookies and other site data" and "Cached images and files," check the boxes.
6. Click **Clear data**.

# **Chrome on Android**

**At the top right, tap More  
Tap History and then Clear browsing data.**

**At the top, choose a time range.  
To delete everything, select All time.**

**Next to "Cookies and site data" and "Cached images and files," check  
the boxes.**

**Tap Clear data.**

# Safari

## Clear the history and cookies from Safari on your iPhone, iPad, or iPod touch

Learn how to delete your history, cookies, and cache in Settings.

### Delete history, cache, and cookies

- To clear your history and cookies, go to Settings > Safari, and tap Clear History and Website Data. Clearing your history, cookies, and browsing data from Safari won't change your AutoFill information.

# Safari

## Block cookies

A cookie is a piece of data that a site puts on your device, so that site can remember you when you visit again. To choose whether Safari blocks cookies, tap Settings > Safari, then turn on Block All Cookies.

## KEY POINTS

- Microsoft is set to invest \$10 billion in OpenAI as part of a funding round that would value the company at \$29 billion, news site Semafor reported Tuesday.
- Microsoft will reportedly get a 75% share of OpenAI's profits until it makes back the money on its investment, after which the company would assume a 49% stake in OpenAI.
- A bet on ChatGPT could help Microsoft boost its efforts in web search, a market dominated by Google.

# Here is one definition of ChatGPT

ChatGPT (Generative Pre-trained Transformer) is a chatbot launched by OpenAI in November 2022.

It is built on top of OpenAI's GPT-3 family of large language models, and is fine-tuned (an approach to transfer learning) with both supervised and reinforcement learning techniques.

# ChatGPT: What it is and how it works

ChatGPT is a free chatbot that's available online as a research preview, which OpenAI says will allow the system to learn from real-world use. You can ask ChatGPT straightforward queries like "Show me healthy dinner ideas" or "What's the best way to answer the 'tell me about yourself' question in a job interview?" But ChatGPT can also do things like write poems, songs and essays. You can ask it to compose a holiday greeting card, organize your to-do list and even draft a resignation letter.

The AI is trained on large volumes of data from the internet written by humans, including conversations. But ChatGPT isn't connected to the internet, so it sometimes produces incorrect answers and has limited knowledge.

# **This has already caused chaos in the world of Education**

**If a student is given an assignment such as  
“Write a three-page document that explains how the Wright  
Brothers invented the airplane”**

**That student could type those words into an online chat with  
ChatGpt and it would spit out the document**

**Instructors did not initially realize those student papers were being  
written for them by ChatGpt**

**Now most colleges and high schools have programs in place to  
detect and block ChatGpt answers**

# **Fewer programmers may be needed**

**ChatGpt can generate computer code/programs**

**One good programmer can now legitimately do  
what not so long ago was the work of many, and  
people who have never programmed will soon be  
able to create workable code as well.**

# **Here is another definition**

**ChatGPT is a large language model (LLM). Large Language Models (LLMs) are trained with massive amounts of data to accurately predict what word comes next in a sentence.**

**It was discovered that increasing the amount of data increased the ability of the language models to do more.**

# Some more information

According to [Stanford University](#):

“GPT-3 has 175 billion parameters and was trained on 570 gigabytes of text.

For comparison, its predecessor, GPT-2, was over 100 times smaller at 1.5 billion parameters.

This increase in scale drastically changes the behavior of the model — GPT-3 is able to perform tasks it was not explicitly trained on, like translating sentences from English to French, with few to no training examples.

# Dall-E Opens Its AI Art Creation Tool to Everyone

The artificial intelligence technology can turn text prompts into intriguing illustrations.
