

DOWNLOADING FONTS FROM DAFONT WEBSITE

1. Go to www.dafont.com

2. Select a font area, or search for a specific name in the search bar.
3. On the far right you will see several different options. Each font could have different ones.
4. Click the DOWNLOAD icon to download fonts.
5. Typically, you will get a small indicator on the lower left corner of your screen.
6. Right click on this zip file. Then click on the 'Show in Folder' to see where the file is on your computer.
7. You may now want to move the file to your 'Font' folder.
8. Right click on the zipped file to get the options. Click on the Extract All...
9. You will need to browse to where you want the font to reside. Probably the 'Font' folder. Click the OK.
10. Now right click the extracted file and click the 'Install' option.
11. You can now type with the font!

You will be able to skip some of these steps on a MAC.
